Correct Answer: C

QUESTION 4

An administrator enabled the Pre-auth check for their guest self-registration.

At what stage in the registration process in this check performed?

A. after the user clicks the login button and after the NAD sends an authentication request

B. after the user self-registers but before the user logs in

C. after the user clicks the login button but before the NAD sends an authentication request

D. when a user is re-authenticating to the network

E. before the user self-registers

Correct Answer: C

The Onboard template is designed for configuration that allows to perform checks before allowing Onboard provisioning for Bring Your Own Device (BYOD) use-cases. This service creates an Onboard Pre-Auth service to check the user\'s credentials before starting the device provisioning process. This also creates an authorization service that checks whether a user\'s device can be provisioned using Onboard.

QUESTION 5

What is the purpose of ClearPass Onboard?

A. to provide MAC authentication for devices that don\'t support 802.1x

B. to run health checks on end user devices

C. to provision personal devices to securely connect to the network

D. to configure self-registration pages for guest users

E. to provide guest access for visitors to connect to the network

Correct Answer: C
