#### QUESTION 1

An Aruba solution runs ArubaOS 8 and uses a standalone controller architecture. Which feature can administrators use to optimize the channel and power plan for the APs?

- A. ARM
- B. Rule Based Client Match
- C. AirMatch
- D. AppRF

Correct Answer: A

---

#### QUESTION 2

What is one networking setting that a network administrator can configure for roles in an Aruba solution?

- A. DHCP pool
- B. ClientMatch rules
- C. source NAT
- D. bandwidth limit

Correct Answer: D

---

#### QUESTION 3

A network administrator wants to assign an authentication server group to the WPA2-Enterprise WLAN. Which profile should the administrator modify?

- A. Virtual AP
- B. SSID
- C. AAA
- D. L2 Authentication

Correct Answer: C

---

#### QUESTION 4

A network administrator creates an employee WLAN on an Aruba solution that uses WLAN WPA2Enterprise security and an external RADIUS server. When the administrator tests the WLAN, the test client receives limited connectivity and cannot access any resources, but the RADIUS server shows that the user authenticated successfully. What should

the administrator check as a possible source of this issue?

- A. the connectivity between the AP that the client is associated to and the MC
- B. the firewall role and policy that apply to this user
- C. the certificate on the RADIUS server
- D. the connectivity between the Master Controller (MC) for the client and the RADIUS server

Correct Answer: B

---

#### QUESTION 5

A company has an Aruba solution that is monitored by AirWave. Several users have recurring connectivity and performance issues with their wireless clients. How can network administrators use AirWave to monitor these clients more easily?

- A. Specify the clients as Watched Clients and view the tables and graphs for these clients.
- B. Click the Down icon in the Airwave banner to quickly see a list of issues with client connections.
- C. Use the Client > Tags windows to tag the client for periodic checks and analysis.
- D. Run Device Summary reports and filter for the client MAC addresses within the report.

Correct Answer: B
