QUESTION 4

Universal containers (UC) wants users to authenticate into their salesforce org using credentials stored in a custom identity store. UC does not want to purchase or use a third- party Identity provider. Additionally, UC is extremely wary of social media and does not consider it to be trust worthy. Which two options should an architect recommend to UC? Choose 2 answers

A. Use a professional social media such as LinkedIn as an Authentication provider

B. Build a custom web page that uses the identity store and calls frontdoor.jsp

C. Build a custom Web service that is supported by Delegated Authentication.

D. Implement the Openid protocol and configure an Authentication provider

Correct Answer: CD

QUESTION 5

A multinational industrial products manufacturer is planning to implement Salesforce CRM to manage their business. They have the following requirements:

1.

 They plan to implement Partner communities to provide access to their partner network .

2.

 They have operations in multiple countries and are planning to implement multiple Salesforce orgs.

3.

 Some of their partners do business in multiple countries and will need information from multiple Salesforce communities.

4.

 They would like to provide a single login for their partners.

How should an Identity Architect solution this requirement with limited custom development?

A. Create a partner login for the country of their operation and use SAML federation to provide access to other orgs.

B. Consolidate Partner related information in a single org and provide access through Salesforce community.

C. Allow partners to choose the Salesforce org they need information from and use login flows to authenticate access.

D. Register partners in one org and access information from other orgs using APIs.

Correct Answer: A
