QUESTION 1

Northern Trail Outfitters (NTO) wants its customers to use phone numbers to log in to their new digital portal, which was designed and built using Salesforce Experience Cloud. In order to access the portal, the user will need to do the following:

1.

 Enter a phone number and/or email address

2.

 Enter a verification code that is to be sent via email or text. What is the recommended approach to fulfill this requirement?

A. Create a Login Discovery page and provide a Login Discovery Handler Apex class.

B. Create a custom login page with an Apex controller. The controller has logic to send and verify the identity.

C. Create an Authentication provider and implement a self-registration handler class.

D. Create a custom login flow that uses an Apex controller to verify the phone numbers with the company\\'s verification service.

Correct Answer: A

QUESTION 2

Northern Trail Outfitters want to allow its consumer to self-register on it business-to- consumer (B2C) portal that is built on Experience Cloud. The identity architect has recommended to use Person Accounts.

Which three steps need to be configured to enable self-registration using person accounts?

Choose 3 answers

A. Enable access to person and business account record types under Public Access Settings.

B. Contact Salesforce Support to enable business accounts.

C. Under Login and Registration settings, ensure that the default account field is empty.

D. Contact Salesforce Support to enable person accounts.

E. Set organization-wide default sharing for Contact to Public Read Only.

Correct Answer: ACD

3 / 5

In an SP-Initiated SAML SSO setup where the user tries to access a resource on the Service Provider, What HTTP param should be used when submitting a SAML Request to the Idp to ensure the user is returned to the intended resourse after authentication?

A. RedirectURL

B. RelayState

C. DisplayState

D. StartURL

Correct Answer: B

QUESTION 4

Universal Containers built a custom mobile app for their field reps to create orders in Salesforce. OAuth is used for authenticating mobile users. The app is built in such a way that when a user session expires after Initial login, a new access token is obtained automatically without forcing the user to log in again. While that improved the field reps\\' productivity, UC realized that they need a "logout" feature.

What should the logout function perform in this scenario, where user sessions are refreshed automatically?

A. Invoke the revocation URL and pass the refresh token.

B. Clear out the client Id to stop auto session refresh.

C. Invoke the revocation URL and pass the access token.

D. Clear out all the tokens to stop auto session refresh.

Correct Answer: A

QUESTION 5

Northern Trail Outfitters (NTO) is planning to roll out a partner portal for its distributors using Experience Cloud. NTO would like to use an external identity provider (idP) and for partners to register for access to the portal. Each partner should be allowed to register only once to avoid duplicate accounts with Salesforce.

What should a identity architect recommend to create partners?

A. On successful creation of Partners using Self Registration page in Experience Cloud, create identity in Ping.

B. Create a custom page m Experience Cloud to self register partner with Experience Cloud and Ping identity store.

C. Create a custom web page in the Portal and create users in the IdP and Experience Cloud using published APIs.

D. Allow partners to register through the IdP and create partner users in Salesforce through an API.

Correct Answer: B
