QUESTION 1

Universal containers (UC) has implemented SAML SSO to enable seamless access across multiple applications. UC has regional salesforce orgs and wants it's users to be able to access them from their main Salesforce org seamless. Which action should an architect recommend?

- A. Configure the main salesforce org as an Authentication provider.
- B. Configure the main salesforce org as the Identity provider.
- C. Configure the regional salesforce orgs as Identity Providers.
- D. Configure the main Salesforce org as a service provider.

Correct Answer: B

QUESTION 2

Northern Trail Outfitters (NTO) is launching a new sportswear brand on its existing consumer portal built on Salesforce Experience Cloud. As part of the launch, emails with promotional links will be sent to existing customers to log in and claim a discount. The marketing manager would like the portal dynamically branded so that users will be directed to the brand link they clicked on; otherwise, users will view a recognizable NTO-branded page.

The campaign is launching quickly, so there is no time to procure any additional licenses. However, the development team is available to apply any required changes to the portal.

Which approach should the identity architect recommend?

- A. Create a full sandbox to replicate the portal site and update the branding accordingly.
- B. Implement Experience ID in the code and extend the URLs and endpoints, as required.
- C. Use Heroku to build the new brand site and embedded login to reuse identities.
- D. Configure an additional community site on the same org that is dedicated for the new brand.

Correct Answer: B

QUESTION 3

Universal Containers uses Salesforce as an identity provider and Concur as the Employee Expense management system. The HR director wants to ensure Concur accounts for employees are created only after the appropriate approval in the Salesforce org.

Which three steps should the identity architect use to implement this requirement?

Choose 3 answers

- A. Create an approval process for a custom object associated with the provisioning flow.
- B. Create a connected app for Concur in Salesforce.

- C. Enable User Provisioning for the connected app.
- D. Create an approval process for user object associated with the provisioning flow.
- E. Create an approval process for UserProvisioningRequest object associated with the provisioning flow.

Correct Answer: BCE

QUESTION 4

A group of users try to access one of universal containers connected apps and receive the following error message : "Failed : Not approved for access". what is most likely to cause of the issue?

- A. The use of high assurance sections are required for the connected App.
- B. The users do not have the correct permission set assigned to them.
- C. The connected App setting "All users may self-authorize" is enabled.
- D. The salesforce administrators gave revoked the Oauth authorization.

Correct Answer: B

QUESTION 5

Universal containers (UC) has a mobile application that calls the salesforce REST API. In order to prevent users from having to enter their credentials everytime they use the app, UC has enabled the use of refresh Tokens as part of the salesforce connected App and updated their mobile app to take advantage of the refresh token. Even after enabling the refresh token, Users are still complaining that they have to enter their credentials once a day. What is the most likely cause of the issue?

- A. The Oauth authorizations are being revoked by a nightly batch job.
- B. The refresh token expiration policy is set incorrectly in salesforce
- C. The app is requesting too many access Tokens in a 24-hour period
- D. The users forget to check the box to remember their credentials.

Correct Answer: B
