QUESTION 1

Northern Trail Outfitters is creating a distributable Salesforce package for other Salesforce orgs within the company. The package needs to call into a custom ApexREST endpoint in the central org. The security team wants to ensure a specific integration account is used in the central org that they will authorize after installation of the package.

Which three items should an architect recommend to secure the integration in the package? Choose 3 answers

- A. Create an Auth provider in the package and set the consumer key and consumer secret of the connected app in the central org.
- B. Contact Salesforce support and create a case to temporarily enable API access for managed packages.
- C. Create a connected app in the central org and add the callback URL of each org the package is installed in to redirect to after successful authentication.
- D. Use an encrypted field to store the password that the security team enters and use password management for external orgs and set the encryption method to TLS 1.2.
- E. Use the Auth Provider configured and select the identity type as Named Principal with OAuth 2.0 as the protocol and Select Start Authentication Flow on Save.

Correct Answer: ACE

QUESTION 2

Northern Trail Outfitters needs to use Shield Platform Encryption to encrypt social security numbers in order to meet a business requirement. Which two considerations should an Integration Architect do prior to the implementation of Shield Platform Encryption? Choose 2 answers

- A. Encrypt the data using the most current key.
- B. Review shield platform encryption configurations.
- C. Encrypt all the data so that it is secure.
- D. Use Shield Platform Encryption as a user authentication or authorization tool.

Correct Answer: AB

QUESTION 3

An Integration Architect has designed a mobile application for Salesforce users to get data while on the road using a custom UI. The application is secured with OAuth and is currently functioning well. There is a new requirement where the

mobile application needs to obtain the GPS coordinates and store it on a custom geolocation field.

The geolocation field is secured with Field Level Security, so users can view the value without changing it.

What should be done to meet the requirement?

- A. The mobile device makes a SOAP API inbound call.
- B. The mobile device receives a REST Apex callout call.
- C. The mobile device makes a REST API inbound call.
- D. The mobile device makes a REST Apex inbound call.

Correct Answer: C

QUESTION 4

A large B2C customer is planning to implement Salesforce CRM to become a Customer centric enterprise. Below, is their current system landscape diagram.

The goals for implementing Salesforce follows:

1.
Develop a 360 view of customer
2.
Leverage Salesforce capabilities for Marketing, Sales and Service processes
3.
Reuse Enterprise capabilities built for Quoting and Order Management processes Which three systems from the current system landscape can be retired with the implementation of Salesforce? Choose 3 answers

- A. Order Management System
- B. Case Management System
- C. Sales Activity System
- D. Email Marketing System
- E. Quoting System

Correct Answer: BCD

QUESTION 5

Universal learning (UC) is embarked on Salesforce transformation journey, UC will decommission the legacy CRM

system and migrate data to Salesforce. The data migration team asked for a recommendation to optimize the performance of the data load to Salesforce.

Which approach should be used to meet the requirement?

- A. Use Bulk API to process jobs in parallel mode.
- B. Contact Salesforce support to schedule performance load.
- C. Use Bulk API to process jobs in serial mode.
- D. Use Bulk API to process jobs in high performance mode.

Correct Answer: A
