QUESTION 1

A subscription-based media company's system landscape forces many subscribers to maintain multiple accounts and to login more than once. An Identity and Access Management (IAM) system, which supports SAML and OpenId, was recently implemented to improve their subscriber experience through self-registration and

Single Sign-On (SSO).

The IAM system must integrate with Salesforce to give new self-service customers instant access to Salesforce Community Cloud.

Which two requirements should the Salesforce Community Cloud support for self- registration and SSO? Choose 2 answers

- A. SAML SSO and Registration Handler
- B. OpenId Connect Authentication Provider and Registration Handler
- C. SAML SSO and just-in-time provisioning
- D. OpenId Connect Authentication Provider and just-in-time provisioning

Correct Answer: BC

QUESTION 2

When user clicks Check Preferences as part of a Lightning flow in Salesforce, preferences from an externally hosted RESTful service are to be checked in real-time. The RESTful service has OpenAPI 2.0 JSON definitions, responding in data types of Boolean and string values.

Which integration pattern and mechanism should be selected to meet the conditions?

- A. Fire and Forget: Process-driven platform events publishes events on Salesforce Event Bus.
- B. Remote Call-In: Salesforce REST API with REST Composite Resources.
- C. Request-Reply: Enhanced External Services invokes a REST API.
- D. Data Virtualization: Salesforce Connect map data external REST data in external objects.

Correct Answer: C

QUESTION 3

Universal Containers is a global financial company that sells financial products and services.

There is a daily scheduled Batch Apex job that generates invoice from a given set of orders.

UC requested building a resilient integration for this batch apex job in case the invoice generation fails.

What should an integration architect recommend to fulfill the requirement?

- A. Build Batch Retry and Error Handling in the Batch Apex Job itself.
- B. Batch Retry and Error Handling report to monitor the error handling.
- C. Build Batch Retry and Error Handling using BatchApexErrorEvent.
- D. Build Batch Retry and Error Handling in the middleware.

Correct Answer: C

QUESTION 4

A large enterprise customer with the following system landscape is planning to implement Salesforce Sales Cloud. The following business processes need to be supported in Salesforce:

1.

Sales Consultants should be able to have access to current inventory.

2.

Enterprise Resource Planning System(ERP) is the system of record for pricing information.

3.

Quotes should be generated in Salesforce with pricing from ERP.

4.

Sales Management uses a Enterprise Business Intelligence (BI) tool to view Sales dashboards.

5.

Master Data Management (MDM) is the system of record for customers and prospects.

6.

Invoices should be accessible in Salesforce.

Which systems in the landscape should the Integration Consultant consider to be integrated with Salesforce to support the business requirements?

- A. ERP, Invoices system, Data Warehouse and BI Tool
- B. ERP, Inventory, Pricing Engine, Invoices system
- C. ERP, MDM, BI tool and Data Warehouse
- D. ERP, MDM, Data Warehouse, Invoices system

Correct Answer: B

QUESTION 5

An Integration Architect has built a solution using REST API, updating Account, Contact, and other related information. The data volumes have increased, resulting in higher API calls consumed, and some days the limits are exceeded. A decision was made to decrease the number of API calls using bulk updates. The customer prefers to continue using REST API to avoid architecture changes.

Which REST API composite resources should the Integration Architect use to allow up to 200 records in one API call?

- A. SObject Collections
- B. SObject Tree
- C. Batch
- D. Composite

Correct Answer: B

Explanation: https://developer.salesforce.com/docs/atlas.en-us.api_rest.meta/api_rest/resources_composite_subject_tree.htm
