QUESTION 1

Jessica and Elise are both making posters for their school's club fair. Jessica can make a 12" by 12" poster in 30 minutes, and Elise can make an 18" by 12" poster in 45 minutes.

Which girl would be able to make a 30" by 30" poster in the least amount of time?

Jessica and Elise are both making posters for their school's club fair. Jessica can make a 12" by 12" poster in 30 minutes, and Elise can make an 18" by 12" poster in 45 minutes.

Which girl would be able to make a 30" by 30" poster in the least amount of time?

- A. Jessica
- B. Elise
- C. It would take them the same amount of time.
- D. The answer cannot be determined from the information given.

Correct Answer: C

QUESTION 2

In the number pattern above, * =

$$\frac{1}{4}, \frac{2}{8}, \frac{3}{12}, \frac{4}{\blacksquare}$$

In the number pattern above, \blacksquare =

- A. 10
- B. 12
- C. 16
- D. 20

Correct Answer: C

QUESTION 3

The first six terms of an arithmetic sequence are shown below.

24, 17, 10, 3, -4, -11

Which expression represents the n th term in this sequence?

- A. $n - 7$
- B. $n + 7$
- C. $-7n + 24$
- D. $-7n + 31$

Correct Answer: D

QUESTION 4

Which best states the main point of the first paragraph (lines 1-21)?

1 Oceans cover most of Earth's surface,
2 and in their depths dwells most of the planet's
3 life. We are drawn to certain aspects of the
4 ocean, yet most of the marine world is alien to
5 us. Just offshore, coral reefs dazzle us with rich
6 colors and complex ecosystems. Reef fish are
7 often quite beautiful, displaying a stunning
8 variety of colors and patterns, and are a
9 favorite choice for fish tanks. However, some
10 parts of the ocean are less familiar to us. Kelp
11 forests – thick, dizzying mazes of life – provide
12 food for snails and urchins, which in turn are a
13 source of food for otters, rockfish, and other
14 predatory animals. Far out beyond the coast,
15 where waves tower over ships, whales and
16 massive fish graze on microscopic plankton,
17 extracting their sustenance from what appears
18 to the naked eye to be nothing but water. And
19 deep down, beyond the continental shelf,
20 beyond the warming rays of the sun, lie the
21 abyssal plains.

22 Here flat grey plains of ooze stretch over
23 incredible distances, shrouded in darkness, fed
24 by a constant rain of decaying matter from the
25 seas above. At first glance, these appear to be
26 dead, empty places, but in truth they teem with
27 life. Most of the life on the abyssal plains is
28 bacterial, but there are larger creatures there
29 too. Deep sea corals grow in the abyssal
30 plains, anchoring themselves to the sea floor.

31 There are also less familiar forms of life, like
32 the giant isopod and the sea pig. The giant
33 isopod is a crustacean, like a shrimp or lobster,
34 but it resembles a pill-bug, and can grow to be
35 more than a foot long. The sea pig is a kind of
36 sea cucumber. Most sea cucumbers resemble
37 slugs, but the sea pig has developed small
38 tubular legs and walks along the sea floor. It
39 gets its name from these legs and from its soft
40 pink flesh. There are fish, too, like the tripod
41 fish which uses long thin fins to perch on top of
42 the ooze, or the anglerfish which uses a
43 glowing rod-like appendage to lure prey into
44 its hungry jaws. And there must be much more
45 than we yet know; although this vast region
46 covers more than half of the entire solid
47 surface of the planet, it is one of the most
48 poorly explored places on Earth.

49 We have explored less than 1% of the
50 area covered by the abyssal plains, and most of
51 that exploration has been conducted by
52 remotely operated vehicles. Although we do
53 have small submarines capable of carrying
54 people to the depths of the ocean, fewer people
55 have gone to the abyssal plains than have gone
56 into space. This deep frontier, vast and
57 mysterious, will surely yield many new
58 discoveries in years to come if we only go and
59 look for them.

- A. People should spend more time in the ocean so that it will seem less alien.
- B. Coral reefs are probably the most beautiful part of the ocean.
- C. The earth's oceans contain a great variety of organisms and environments.
- D. The abyssal plains are the deepest parts of the ocean.

Correct Answer: C

QUESTION 5

Select the word that best completes the sentence.

While many present-day readers think *The Great Gatsby* is historically accurate, readers during the 1930s found it an _____ portrayal of the times.

- A. illiterate
- B. inauthentic
- C. independent
- D. ingenious

Correct Answer: B
