QUESTION 1

The ambition of the security manager is to certify the organization against ISO/IEC 27001. What is an activity in the certification program?

- A. Formulate the security requirements in the outsourcing contracts
- B. Implement the security baselines in Secure Systems Development Life Cycle (SecSDLC)
- C. Perform a risk assessment of the secure internet connectivity architecture of the datacenter
- D. Produce a Statement of Applicability based on risk assessments

Correct Answer: D

QUESTION 2

A security manager just finished the final copy of a risk assessment. This assessment contains a list of identified risks and she has to determine how to treat these risks.

What is the best option for the treatment of risks?

- A. Begin risk remediation immediately as the organization is currently at risk
- B. Decide the criteria for determining if the risk can be accepted
- C. Design appropriate controls to reduce the risk
- D. Remediate the risk regardless of cost

Correct Answer: B

QUESTION 3

The Board of Directors of an organization is accountable for obtaining adequate assurance. Who should be responsible for coordinating the information security awareness campaigns?

- A. The Board of Directors
- B. The operational manager
- C. The security manager
- D. The user

Correct Answer: C

QUESTION 4

In a company the IT strategy is migrating towards a Service Oriented Architecture (SOA) so that migrating to the cloud is better feasible in the future. The security architect is asked to make a first draft of the security architecture.

Which elements should the security architect draft?

- A. Management and control of the security services
- B. The information security policy, the risk assessment and the controls in the security services
- C. Which security services are provided and in which supporting architectures are they defined

Correct Answer: C

QUESTION 5

The information security architect of a large service provider advocates an open design of the security architecture, as opposed to a secret design.

What is her main argument for this choice?

- A. Open designs are easily configured.
- B. Open designs have more functionality.
- C. Open designs are tested extensively.

Correct Answer: C
