QUESTION 1

Why is it important to update the system BIOS when building a new server?

- A. Updating the BIOS causes the fan speed control to be set correctly for a chassis.
- B. Updating the BIOS configures the BMC settings for remote access.
- C. Updating the BIOS implements the latest updates and fixes for a system.
- D. Updating the BIOS ensures the BMC and HSC have a clear communication path.

Correct Answer: C

QUESTION 2

As an Intel Server Specialist you have been asked by one of your biggest server resellers for help in planning and configuring their new line of servers. One of their questions relates to graphics; in which of the following Intel Server boards can Intel HD graphics be used. How would you answer from the list below? (Select ALL that apply).

- A. S1200BTL
- B. S1200V3RPL
- C. S1600?P
- D. S1200V3RPM
- E. S1400FP

Correct Answer: BD

QUESTION 3

A PCIe Gen3 x8 12Gb SAS RAID controller with 8 ports, can theoretically deliver throughput.

- A. 9,600 MB/s
- B. 8,000 MB/s
- C. 4,400 MB/s
- D. 12,000 MB/s

Correct Answer: B

QUESTION 4

An Intel Server Board S2600WT2 has been assembled and powered on; however, the status LED on the front panel

blinks with an amber colour which means a non-critical alert has occurred. Which of the following might be the BEST way to find the reason for this alert?

- A. Listen to beep code and look for it in TPS.
- B. Look up ERROR MANAGER in the BIOS.
- C. View POST LED code and look for it in TPS.
- D. View the SEL log.

Correct Answer: D

QUESTION 5
