### QUESTION 1

Which of the following is a function of the BIOS Recovery Boot feature?

- A. BIOS recovery boot can be used to apply a BIOS version to a system that has a corrupt BIOS.
- B. BIOS recovery boot is the recommended approach to reset any BIOS passwords.
- C. BIOS recovery boot is always used as part of the BIOS update process.
- D. BIOS recovery boot can be used to recover the BIOS settings from the last known good configuration of the system.

Correct Answer: A

---

### QUESTION 2

Your customer calls you to say that their server R1208RPM5H0R is having problems with the redundant power supply. The email alerts configured on first installation keep sending emails saying "Reports redundancy has been lost, but the unit is still functioning with the minimum amount of resources needed for normal operation Asserted." The IT manager is complaining "my inbox is filling up, even though it is quite clear that the server still operates, and please can you get rid of these horrible alerts." What should the Intel Server Specialist suggest for his customer? (Select ALL that apply).

- A. Pay the customer a visit to carry out a physical check on the server.
- B. Log into the embedded web server on the system to check if the second PSU was operating and when it stopped operating.
- C. Advise the customer to do an RMA on both the PSUs.
- D. Ask the customer to do a physical inspection of the back of the server for a 2nd power cable connected to a live supply.
- E. Ask the customer what was happening with the server on the date that the redundant power was first lost.
- F. Advise the customer to do an RMA on the entire server.

Correct Answer: BDE

---

### QUESTION 3
