QUESTION 1

You are working on a service provider network. You will provide network services to multiple companies across your network, while maintaining separation of traffic for different corporate entities.

What are two high-level design alternatives that will meet your requirement? (Choose two.)

- A. IPsec VPN
- B. VRRP
- C. MSDP
- D. MPLS

Correct Answer: AD

QUESTION 2

Your customer is a government organization with strict security requirements. They want to expand their Layer 2 infrastructure between multiple buildings within the same campus environment. They also want to ensure that no unauthorized devices are connected between the switches in the different buildings. Which solution ensures data security in this environment?

- A. Use PNAC on all inter-switch connections.
- B. Use LLDP on all inter-switch connections.
- C. Use LACP on all inter-switch connections.
- D. Use MACsec on all inter-switch connections.

Correct Answer: A

QUESTION 3

Which popular data center architecture provides improved availability between two switching nodes?

- A. MPLS traffic engineering
- B. multichassis link aggregation
- C. 802.1br
- D. fabric Clos architecture

Correct Answer: D

QUESTION 4

You are examining the customer's IT organization and its responsibilities to determine how it will be impacted by your design.

In this scenario, which three business functions are typically provided? (Choose three.)

- A. network architecture and design
- B. compute resource provisioning
- C. manufacturing
- D. network operations
- E. product marketing

Correct Answer: ABD

QUESTION 5
