### QUESTION 1

You are asked to deploy a security solution in your data center that ensures all traffic flows through the SRX Series devices.

Which firewall deployment method meets this requirement?

- A. one-arm
- B. two-arm
- C. transparent
- D. inline

Correct Answer: D

---

### QUESTION 2

You are working with a customer to create a design proposal using SRX Series devices. As part of the design, you must consider the requirements shown below:

1.

You must ensure that every packet entering your device is independently inspected against a set of rules.

2.

You must provide a way to protect the device from undesired access attempts.

3.

You must ensure that you can apply a different set of rules for traffic leaving the device than are in use for traffic entering the device.

In this scenario, what do you recommend using to accomplish these requirements?

- A. firewall filters
- B. intrusion prevention system
- C. unified threat management
- D. screens

Correct Answer: A

---

### QUESTION 3

You are working on a network design that will use EX Series devices as Layer 2 access switches in a campus environment. You must include Junos Space in your design. You want to take advantage of security features supported on the devices.

Which two security features would satisfy this requirement? (Choose two.)

- A. SDSN
- B. Stateful Firewall
- C. Access Control
- D. ALG

Correct Answer: BC

---

### QUESTION 4

You are concerned about malicious attachments being transferred to your e-mail server at work through encrypted channels. You want to block these malicious files using your SRX Series device.

Which two features should you use in this scenario? (Choose two.)

- A. Sky ATP SMTP scanning
- B. Sky ATP HTTP scanning
- C. SSL forward proxy
- D. SSL reverse proxy

Correct Answer: AC

---

### QUESTION 5

You are designing a data center interconnect between two sites across a service provider Layer 2 leased line. The sites require Layer 2 connectivity between hosts, and the connection must be secure.

In this scenario, what will accomplish this task?

- A. IRB VLAN routing
- B. MACsec encryption
- C. EVPN over IPsec

D. IPsec encryption

Correct Answer: B
