QUESTION 2

You are required to design a university network to meet the conditions shown below.

Users connected to the university network should be able to access the Internet and the research department lab network.

The research department lab network should not be able to reach the Internet.

Which three actions satisfy the design requirements? (Choose three.)

- A. Use a global permit policy for Internet traffic
- B. Use a global deny security policy for the research lab
- C. Use separate security zones for each department
- D. Use the default deny security policy for the research lab
- E. Use a static NAT rule between the internal zones for the research lab

Correct Answer: ACD

QUESTION 3

Policy Enforcer provides which benefit?

- A. log management
- B. command and control protection
- C. centralized management of security devices

D. IPsec encryption

Correct Answer: C

QUESTION 4

You are concerned about users downloading malicious attachments at work while using encrypted Web mail. You want to block these malicious files using your SRX Series device.

In this scenario, which two features should you use? (Choose two.)

- A. SSL reverse proxy
- B. SSL forward proxy
- C. Sky ATP SMTP scanning
- D. Sky ATP HTTP scanning

Correct Answer: BC

QUESTION 5

You are deploying Security Director with the logging and reporting functionality for VMs that use SSDs. You expect to have approximately 20,000 events per second of logging in your network.

In this scenario, what is the minimum number of logging and reporting devices that should be used?

- A. 2
- B. 4
- C. 1
- D. 3

Correct Answer: C
