QUESTION 1

You are designing an SDSN security solution for a new campus network. The network will consist of Juniper Networks Policy Enforcer, Juniper Networks switches, third-party switches, and SRX Series devices. The switches and the SRX Series devices will be used as security enforcement points.

Which component supports the SRX Series devices in this scenario?

- A. Security Director
- B. RADIUS server
- C. certificate server
- D. DHCP server

Correct Answer: A

Reference: https://www.juniper.net/documentation/en_US/release-independent/solutions/topics/concept/sg-006a-sdsn-product-components.html

QUESTION 2

You must allow applications to connect to external servers. The session has embedded IP address information to enable the remote system to establish a return session.

In your design, which function should be implemented?

- A. source NAT
- B. application layer gateway
- C. destination NAT
- D. HTTP redirect

Correct Answer: A

QUESTION 3

You are working on a network design that will use EX Series devices as Layer 2 access switches in a campus environment. You must include Junos Space in your design. You want to take advantage of security features supported on the devices.

Which two security features would satisfy this requirement? (Choose two.)

- A. SDN
- B. Stateful Firewall
- C. Access Control

D. ALG

Correct Answer: BC

Reference: https://www.juniper.net/documentation/en_US/junos/topics/concept/ex-series-securityoverview.html

QUESTION 4

You are working with a customer to create a design proposal using SRX Series devices. As part of the design, you must consider the requirements shown below:

1.

You must ensure that every packet entering your device is independently inspected against a set of rules.

2.

You must provide a way to protect the device from undesired access attempts.

3.

You must ensure that you can apply a different set of rules for traffic leaving the device than are in use for traffic entering the device.

In this scenario, what do you recommend using to accomplish these requirements?

A. firewall filters

B. intrusion prevention system

C. unified threat management

D. screens

Correct Answer: A

Reference: https://www.juniper.net/documentation/en_US/junos/topics/example/firewall-filter-statelessexample-trusted-source-block-telnet-and-ssh-access.html

QUESTION 5

You are asked to design a VPN solution between 25 branches of a company. The company wants to have the sites talk directly to each other in the event of a hub device failure. The solution should follow industry standards.

Which solution would you choose in this scenario?

A. AutoVPN

B. Auto Discovery VPN

C. Group VPN

D. full mesh VPN

Correct Answer: B

Reference: https://www.juniper.net/documentation/en_US/junos/topics/topic-map/security-auto-discoveryvpns.html
