QUESTION 1

A hosting company is migrating to cloud-based solutions. Their customers share a physical firewall cluster, subdivided into individual logical firewalls for each customer. Projection data shows that the cloud service will soon deplete all the resources within the physical firewall. As a consultant, you must propose a scalable solution that continues to protect all the cloud customers while still securing the existing physical network.

In this scenario, which solution would you propose?

- A. Deploy a vSRX cluster in front of each customer\\'s servers while keeping the physical firewall cluster
- B. Deploy a software-defined networking solution
- C. Remove the physical firewall cluster and deploy vSRX clusters dedicated to each customer\\'s servers
- D. Replace the physical firewall cluster with a higher-performance firewall

Correct Answer: C

QUESTION 2

You are designing a data center interconnect between two sites across a service provider Layer 3 VPN service. The sites require Layer 2 connectivity between hosts, and the connection must be secure.

In this scenario, what will accomplish this task?

- A. EVPN over IPsec
- B. MACsec encryption
- C. SSL VPN encryption
- D. stacked VLAN tagging

Correct Answer: B

QUESTION 3

You are working on a network design that will use EX Series devices as Layer 2 access switches in a campus environment. You must include Junos Space in your design. You want to take advantage of security features supported on the devices.

Which two security features would satisfy this requirement? (Choose two.)

- A. SDSN
- B. Stateful Firewall
- C. Access Control
- D. ALG

QUESTION 4

You are working with a customer to create a design proposal using SRX Series devices. As part of the design, you must consider the requirements shown below:

1.

You must ensure that every packet entering your device is independently inspected against a set of rules.

2.

You must provide a way to protect the device from undesired access attempts.

3.

You must ensure that you can apply a different set of rules for traffic leaving the device than are in use for traffic entering the device.

In this scenario, what do you recommend using to accomplish these requirements?

- A. firewall filters
- B. intrusion prevention system
- C. unified threat management
- D. screens

Correct Answer: A

QUESTION 5

Your customer needs help designing a single solution to protect their combination of various Junos network devices from unauthorized management access.

Which Junos OS feature will provide this protection?

- A. Use a firewall filter applied to the fxp0 interface
- B. Use a security policy with the destination of the junos-host zone
- C. Use the management zone host-inbound-traffic feature
- D. Use a firewall filter applied to the lo0 interface

Correct Answer: A
