QUESTION 1

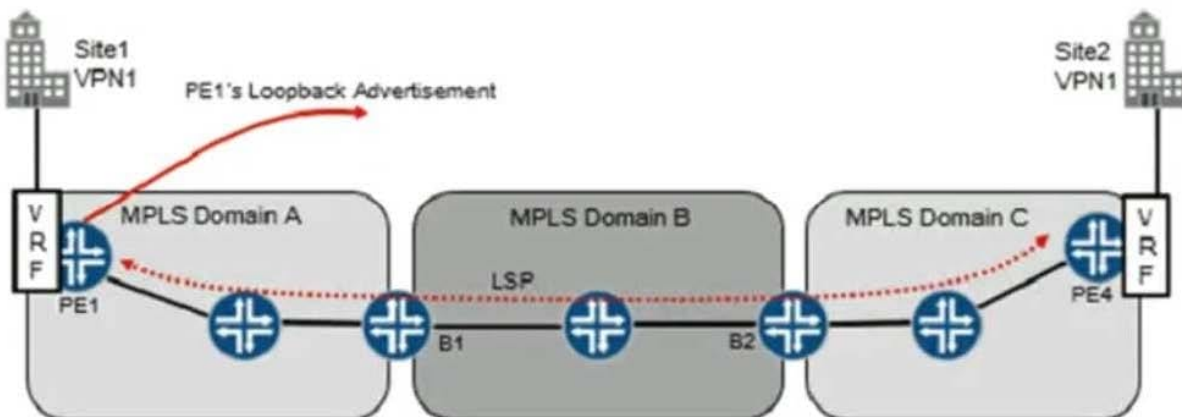

You work for an organization providing hosting services for customer application VMs. Traditionally, your organization maintained isolation between customer workloads by assigning unique VLAN IDs to each customer network. Your organization is approaching the upper limit of 4094 VLANs available to uniquely identify customer networks. You need to alleviate this limitation and provide more than 4094 unique network identifiers. Which technology would satisfy these requirements?

- A. VXLAN
- B. MPLS
- C. MP-BGP
- D. EVPN

Correct Answer: A

QUESTION 2

Click the Exhibit button. Referring to the network design shown in the exhibit, you must ensure that VPN data between Site1 and Site2 will be carried over a single end-to-end LSP. How would you advertise PE1's loopback address to accomplish this task?

- A. over a single MP-IBGP session (L3VPN NLRI) between PE1/PE4
- B. over BGP-LU sessions between the PE1/B1, B1/B2 and B2/PE4
- C. over a single IBGP session (IPv4 unicast NLRI) between PE VPE4
- D. over a single EBGP session (IPv4 unicast NLRI) between PE1/PE4

Correct Answer: B

QUESTION 3

Your customer is deploying a multi-tenant data center and needs help with the WAN edge design. What are two main design considerations for this environment? (Choose two)

- A. support for Virtual Chassis Control Protocol
- B. support for unified threat management
- C. support for Network Address Translation
- D. support for data collection and analysis

Correct Answer: CD

QUESTION 4

Your customer's WAN edge connects to two service providers SP-A and SP-B. The customer is advertising a single /22 subnet to both service providers through EBGP peering sessions. The customer wants to influence inbound traffic to the advertised /22 destination prefix so that it passes through SP-A when both paths are operational. Which action meets the customer's requirement?

- A. Advertise the prefix to SP-B with a higher local preference.
- B. Advertise the prefix to SP-A with a higher local preference.
- C. Prepend your AS number multiple times on the prefix advertised to SPA.
- D. Prepend your AS number multiple times on the prefix advertised to SP-B.

Correct Answer: D

QUESTION 5

Exhibit: Referring to the exhibit which type of IPsec VPN should be used to create the desired topology?

- A. AutoVPN
- B. fully meshed VPN
- C. Group VPN
- D. hub-and-spoke VPN

Correct Answer: C
