QUESTION 1

Which Python operator tests two variables to see if they contain the same value?

A. !=

B. != =

C. = =

D. =

Correct Answer: C

Reference: https://www.programiz.com/python-programming/operators

QUESTION 2

Which statement is true about YAML?

A. YAML is a Unicode-based serialization language designed around common data types

B. YAML is designed around parsing speed over human readability

C. YAML is widely used on the Internet as a method to mode data between webservers and AJAX clients on Web browsers

D. YAML follows the lowest common denominator data types and requires simple processing between different programming environments

Correct Answer: A

Reference: http://yaml.org/spec/spec.pdf

QUESTION 3

Click the Exhibit button.

Which two actions are performed by the PyEZ Python script shown in the exhibit? (Choose two.)

```
from jnpr.junos import Device
from jnpr.junos.utils.config import Config
from jnpr.junos.exception import ConnectError

host = 'dcla.example.com'

def main():

    dev = Device(host=host)

    try:
        dev.open()
    except ConnectError as err:
        print ("Cannot connect to device: {0}".format(err))
        return

    cu = Config(dev)

    try:
        rescue = cu.rescue(action= "get", format = "text")
        if rescue is None:
            print ("No existing rescue configuration.")
            print ("Saving rescue configuration.")
            cu.rescue(action="save")
        else:
            print ("Rescue configuration found:")
            print (rescue)
    except Exception as err:
        print (err)

    dev.close()

if _name_ == "_main_":
    main()
```

A. It saves the current configuration as a rescue configuration only if one does not exist

B. It prints the rescue configuration if one already exists

C. It prints the rescue configuration after it has been replaced

D. It always saves the current configuration as a rescue

Correct Answer: AB

QUESTION 4

Which statement is true regarding Python?

A. To obtain functionality from a package, it must be imported using the Python keyword module
