QUESTION 1

You are creating a new Contrail cluster within the Contrail Command setup wizard.

In this scenario, which three parameters are required to create the cluster? (Choose three.)

- A. Container Registry
- B. cluster name
- C. NTP server
- D. Default Virtual Gateway
- E. Contrail version

Correct Answer: ABE

Reference: https://www.juniper.net/documentation/en_US/contrail19/topics/example/contrail-commandcluster.html

QUESTION 2

You decide to create only host routes for each of your virtual networks in a project. Each virtual network is sent its correct host prefix. When troubleshooting inter-VN connectivity, using the ping command, the response times out between two virtual networks even though your policies allow for it.

What is the problem in this scenario?

- A. The VMs do not have interfaces.
- B. Using host routes prevents the default route from being sent.
- C. Your VMs have incorrect DNS settings.
- D. The IPAM settings are incorrect.

Correct Answer: C

QUESTION 3

A vRouter includes which two containers? (Choose two.)

- A. nodemgr
- B. dns
- C. api
- D. agent

Correct Answer: AD

Reference: <https://docs.mirantis.com/mcp/q4-18/mcp-ref-arch/opencontrail-plan/contrail-components/contrail-components-4.html>

QUESTION 4

Which SDN solution allows the control plane to remain on legacy hardware as a stop-gap measure until you are ready to replace the current hardware?

- A. SDN using NVGRE
- B. SDN as an overlay
- C. SDN using an API
- D. open SDN

Correct Answer: B

QUESTION 5

Which two deployment methods does AppFormix support? (Choose two.)

- A. Hyper-V
- B. VMware
- C. OpenStack
- D. Xen

Correct Answer: BC

Reference: https://www.juniper.net/documentation/en_US/appformix/topics/concept/appformix-general-requirements.html
