Your manager asks you to troubleshoot an Ansible problem when logging into a Junos device. You notice the Ansible play in question has a `vars_files` argument that calls the `variables.yml` entry file. The contents of that file are displayed in the exhibit.

What is happening in this scenario?

- A. The file is an SSH key
- B. The `variables.yml` file is not actually a YAML file
- C. The file is encrypted with `ansible-vault`

D. The file is encrypted with ansible

Correct Answer: C

QUESTION 4

What are three elements of a JET notification message? (Choose three)

- A. time
- B. severity
- C. username
- D. subscription type
- E. hostname

Correct Answer: ABE

JET notification is delivered in JSON format. The JSON message has two parts, one the header, and other the event-information portion, called attributes. The header is common for all events. It contains the event ID, hostname, time, severity, and facility of the event. The attributes vary depending event's topic name.
