QUESTION 1

You have implemented APBR on your SRX Series device and are verifying that your changes are working properly. You notice that when you start the application for the first time, it does not follow the expected path.

What are two reasons that would cause this behavior? (Choose two.)

A. The application system cache does not have an entry for the first session.

B. The application system cache has been disabled.

C. The application system cache already has an entry for this application.

D. The advanced policy-based routing is applied to the ingress zone and must be moved to the egress zone.

Correct Answer: AB

QUESTION 2

Click the Exhibit button.

Referring to the exhibit, you have expanded the disk storage size in ESXi for your log collector from 500 GB to 600 GB. However, your log collector\'s disk size has not changed.

Given the scenario, which two statements are true? (Choose two.)

A. You must run a script from the console to expand the disk size.

B. The ESXi storage parameter is not associated with the Elasticsearch disk size parameter.

C. You must reboot the log collector for storage settings to be updated

D. You must re-run the log collector setup script to update the storage settings.

Correct Answer: AC

QUESTION 3

You want to review AppTrack statistics to determine the characteristics of the traffic being monitored. Which operational mode command would accomplish this task on an SRX Series device?

A. show services application-identification statistics applications

B. show services application-identification application detail

C. show security application-tracking counters

D. show services security-intelligence statistics

Correct Answer: A

QUESTION 4

Click the Exhibit button.

```
user@host > show services user-identification authentication-table
authentication-source active-directory
Domain: example
Total enteries: 1
Source IP       Username        groups(Ref by policy)       state
192.168.50.8    user1           grp1                        Initial
```

Which statement explains the current state value of the command output shown in the exhibit?

A. A valid response was received from a domain PC probe, and the user is a valid domain user programmed in the PFE.

B. An invalid response was received from a domain PC probe, and the user is an invalid domain user.

C. A probe event generated an entry in the authentication table, but no probe response has been received from the domain PC.

D. The user-to-address mapping was successfully read from the domain controller event logs, and an entry was added to the authentication table witch currently resides on the Routing Engine.

Correct Answer: A

QUESTION 5

Which statement about transparent mode on an SRX340 is true?

A. You must reboot the device after configuring transparent mode.

B. Security policies applied to transparent mode zones require Layer 2 address matching.

C. Screens are not supported in transparent mode security zones.

D. All interfaces on the device must be configured with the ethernet-switching protocol family.

Correct Answer: A
