QUESTION 1

You are implementing user authentication on your network using an SRX Series device and want to ensure that there are redundant forms of authentication for users to access the network. You have configured the device with the integrated user firewall and user role firewall features. You are testing failover methods using the default priority values.

In this scenario, which two statements are true? (Choose two.)

- A. If the user fails local authentication, then the Junos OS will attempt to authenticate the user with a user role firewall.
- B. If the user fails user role firewall authentication, then the Junos OS will attempt to authenticate the user with an integrated user firewall.
- C. If the user fails integrated user firewall authentication, then the Junos OS will attempt to authenticate with a user role firewall.
- D. If the user fails local authentication, then the Junos OS will attempt to authenticate the user with an integrated user firewall.

Correct Answer: CD

QUESTION 2

Click the Exhibit button.

```
[edit]
user@host# show security application-tracking
first-update-interval 1;

[edit]
user@host# show security zones security-zone trust
tcp-rst;
host-inbound-traffic {
    system-services {
        all;
    }
}
interfaces {
    ge-0/0/2.0;
}
application-tracking;
```

Referring to the exhibit, how many AppTrack logs will be generated for an HTTP session lasting 12 minutes?

- A. 4

B. 2

C. 1

D. 3

Correct Answer: A

QUESTION 3

Which three components are part of the AppSecure services suite? (Choose three.)

A. IDP

B. Sky ATP

C. AppQoS

D. AppFW

E. Web filtering

Correct Answer: ACD

QUESTION 4

You are using IDP on your SRX Series device and are asked to ensure that the SRX Series device has the latest IDP database, as well as the latest application signature database.

In this scenario, which statement is true?

A. The application signature database cannot be updated on a device with the IDP database installed.

B. You must download each database separately.

C. The IDP database includes the latest application signature database.

D. You must download the application signature database before installing the IDP database.

Correct Answer: C

QUESTION 5

You have configured a log collector VM and Security Director. System logging is enabled on a branch SRX Series device, but security logs do not appear in the monitor charts.

How would you solve this problem?

A. Configure a security policy to forward logs to the collector.

B. Configure application identification on the SRX Series device.

C. Configure security logging on the SRX Series device.

D. Configure J-Flow on the SRX Series device.

Correct Answer: C
