QUESTION 1

If the ePO server's access to the Internet is allowed, which of the following options would the administrator have to check in the McAfee ENS Migration Assistant extension?

- A. Software Manager
- B. Server Client Package Install
- C. Master Repository
- D. Workstation Client Package Install

Correct Answer: C

QUESTION 2

The ENS administrator wants to monitor remotely the modification of files, but BigFix.exe is generating many false positives. Which of the following should the ENS administrator do?

- A. Exclude the file under Threat Prevention / Access Protection / Remotely creating or modifying Files or Folders.
- B. Add the file as a High Risk Process under Threat Prevention / On Access Scan / Process settings.
- C. Exclude the file under Common Options / Self Protection.
- D. Add the file under Threat Prevention / Options/ Exclusions by detection name.

Correct Answer: C

QUESTION 3

An ePO administrator is experiencing issues installing an ENS module on a client machine and decides to investigate by analyzing the install log. In which of the following locations will the administrator find the install log, assuming it is in its default location on the endpoint?

- A. %programdata%\mcafee\datreputation\logs
- B. **\program files\mcafee\
- C. %temp%\mcafeelogs
- D. %programdata%\mcafee\Agent\logs

Correct Answer: D

QUESTION 4

On Windows 8 and 10 machines, Windows places a flag in the tile of an app, causing Windows to notify the user of a

problem and directing the user to the Windows Store to reinstall. This flag is placed on the tile when the Threat Prevention scanner detects a threat in the path of an installed Windows Store app, and marks the application as:

- A. malicious.
- B. suspicious.
- C. questionable.
- D. tampered.

Correct Answer: A

QUESTION 5

Which of the following describes the difference in functionality between Real Protect cloud-based and Real Protect client-based?

- A. The location where the centralized management server and policies are managed
- B. The location from which AMCore content updates are pulled before on-demand scans
- C. The location where the scanning is conducted on file attributes and behavior
- D. The location where malware is quarantined on the managed system

Correct Answer: A
