QUESTION 1

An ePO administrator needs to add exclusions for a folder. The folder has been created in several locations, including C:\Program Files\Custom\Acme or C:\Program Files\Acme, but the folder could be located in other subfolders in the Program Files folder.

Which of the following is the correct way to write an exclusion for the Acme folder?

- A. \Program Files\?\Acme
- B. \Program Files**\Acme
- C. \Program Files*\Acme
- D. \Program Files\??\Acme

Correct Answer: C

QUESTION 2

While tuning the firewall policy, the ePO administrator notices unauthorized traffic is being initiated by a file transfer utility application. If this is a recently approved application, in which of the following locations should this be configured to allow FTP traffic only with this application?

- A. Add a new rule within the Access Protection policy to block port 21 and exclude the executable for the software.
- B. Put a new rule in the Exploit Prevention policy to include the executable for the software for additional protection.
- C. Exclude the process associated with the software within the On Access Scan policy's Low-Risk Processes section.
- D. Create an allow rule within the Rules policy for inbound/outbound on port 21 and the executable for the software.

Correct Answer: A

QUESTION 3
