QUESTION 1

When presented with a file-reputation response prompt, which of the following should a user select when responding to the file-reputation prompt to prevent future prompting for the same file type?

- A. Do not show this prompt again.
- B. Remember this decision.
- C. Allow this selection.
- D. Whitelist this selection.

Correct Answer: A

QUESTION 2

While tuning the firewall policy, the ePO administrator notices unauthorized traffic is being initiated by a file transfer utility application. If this is a recently approved application, in which of the following locations should this be configured to allow FTP traffic only with this application?

- A. Add a new rule within the Access Protection policy to block port 21 and exclude the executable for the software.
- B. Put a new rule in the Exploit Prevention policy to include the executable for the software for additional protection.
- C. Exclude the process associated with the software within the On Access Scan policy's Low-Risk Processes section.
- D. Create an allow rule within the Rules policy for inbound/outbound on port 21 and the executable for the software.

Correct Answer: A

QUESTION 3

An IT department is looking for a way to optimize performance with on-access scanning. To maximize security and minimize the impact on the system, on-access scanning should be configured to scan files at which of the following frequencies?

- A. Disable on-access scanning.
- B. Let McAfee decide.
- C. Only scan files on write.
- D. Only scan files on read.

Correct Answer: C

QUESTION 4

An ENS administrator wants the end user to be able to view the web safety information. In addition to enabling Web Control, which of the following describes the requirements for this?

- A. The Web Control Plug-in site report must be enabled on the browser toolbar.
- B. Content Action settings must be configured to specify the action to apply according to the site rating.
- C. The Web Control Plug-in must be enabled in the browser, and "Warn" must be selected in Action Enforcement.
- D. The Web Control Plug-in must be enabled in the browser, and the client browser toolbar must be enabled.

Correct Answer: A

QUESTION 5

A user is reporting a functional issue with the ENS client. Which of the following logs should be checked?

- A. ExploitPrevention_Debug.log
- B. OnDemandScan_Debug.log
- C. EndpointSecurityPlatform_Errors.log
- D. AdaptiveThreatProtection_Debug.log

Correct Answer: C
