QUESTION 1

You are updating a Magento Commerce Cloud project from version 2.2.5 to 2.3.0 with the command

```
composer require magento/product-enterprise-edition:2.3.0
```

However, composer is unable to complete the task because the installed version of magento/magentocloud-metapackage is not compatible.

How do you upgrade Magento to the desired version?

- A. Create a new project based on magento/project-enterprise-edition:2.3.0, then add ece-tools, custom modules and themes again with composer and migrate the data
- B. Run `composer require magento/magento-cloud-metapackage:">=2.3.0"`
