### QUESTION 1

#### HOTSPOT

A candy manufacturer uses Dynamics 365 Supply Chain Management.

A master planning run needs to prioritize the production jobs for fruit snacks by flavor and color every 16 days.

You need to configure the appropriate parameters in the coverage group.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

## Answer Area

### Field

### Configuration

Time fence

	▼
Sequencing	
Capacity	
Forecast plan	

Period type

	▼
Day	
Week	
Month	
Quarter	

Correct Answer:

### QUESTION 2

#### SIMULATION

You are a functional consultant for Contoso Entertainment System USA (USMF).

You need to configure the system to ensure that planned master orders generated by Material Requirements Planning (MRP) contain trade agreements.

To complete this task, sign in to Dynamics 365 portal.

Correct Answer:

1.

Navigate to the Master Planning Parameters form (Master Planning > Setup > Master Planning Parameters).

2.

Select the Planned Orders tab.

3.

Select the Find Trade Agreements option.

4.

Save the changes.

### QUESTION 3

#### DRAG DROP

A company uses Dynamics 365 Supply Chain Management to sell fruits and vegetables.

Pricing is dependent on specific commodity market costs to assure fair market pricing.

You need to configure a batch job to update the price and margin data.

Which fields should you use in the configuration? To answer, drag the appropriate fields to the correct requirements. Each field may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Fields	Answer Area	Field
Cost basis type	<b>Requirement</b>	Field
Dimension set	Specify the commodity market for the foundation of the pricing.	Field
Pricing template	Specify the quantity and margin values to use in the pricing calculations.	Field
Trade agreement		

Correct Answer:

Fields	Requirement	Field
<input type="text"/>		
Dimension set	Specify the commodity market for the foundation of the pricing.	Cost basis type
<input type="text"/>		
Trade agreement	Specify the quantity and margin values to use in the pricing calculations.	Pricing template

Explanation:

Box 1: Cost basis type

The following parameters in Inventory management > Setup > Inventory and Warehouse Parameters > Commodity Pricing tab must be set to use commodity pricing in Dynamics 365 Supply Chain Management.

Cost basis type - Select the cost basis to use as the default for new pricing calculations.

Pricing template - Select the pricing template to use as a default when you generate a pricing and margin update.

Incorrect:

Dimension set - Enter the financial dimensions to use as the default account, department, cost center, and purpose for commodity pricing.

Box 2: Pricing template

Use this procedure to set up quantity and margin template criterion, such as price margin amounts and percentages, to be attached to a commodity pricing template.

Click Inventory management > Setup > Commodity pricing > Pricing template.

Select the commodity pricing template to which the new quantity and margin template must be attached.

Click the Quantity and margin template button.

Etc.

Batch job quantity and margin values

#### QUESTION 4

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a

unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company produces and distributes seafood to supermarkets. During the manufacturing process, raw seafood is purchased, cleaned, and packaged into various-sized boxes. Each box may have a different weight.

Product is sold by the box and priced by the pound.

You need to ensure that you can perform transactions at the box level and record the net weight of goods shipped to a customer.

Solution: Set up the product with a sales unit measure of pounds and inventory unit measure of box. Set a standard unit conversation for the product from box to pounds.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

---

## QUESTION 5

You need to configure replenishment for the Street Kid YOLO bicycles.

Which configuration should you use?

- A. Coverage plan by dimension
- B. Master planning parameters
- C. Item coverage
- D. Default order settings
- E. Coverage group

Correct Answer: B

Explanation:

You can set up master planning to create planned orders for requisition demand. Set the Include requisitions option to Yes on the General FastTab of the Master plans page. Then, when the purpose of an approved requisition is

replenishment, master planning automatically creates a corresponding planned order to fulfill it. The replenishment method is determined by the supply policies that have been set up for the items in your organization. After the replenishment

requisition is created and approved, no additional user action is required.

Note: Bicycle models are measured and reported against how well a single model performs as a sum of all the variations of that model. For example, the Street Kid YOLO model sold 25,000 units in 2019 across all variations of the product,

but the Purple Female frame made up 30 percent of that model's sales.

The Street Kid YOLO models sell in different volumes depending on the market.
