**QUESTION 1**

You need to configure production control parameters for liquid cleaning solution manufacturing. What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Require an electronic signature when the formula is approved.

B. Select Block editing and approve the formula.

C. Select the Block removal of approval option for the formula

D. Select the Block editing option only.

Correct Answer: BC

Reference: https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/formulas-versions

**QUESTION 2**

A client subcontracts production work to a vendor for production operations. You need to model subcontracting of route operations in production orders.

Solution: Ensure that cost control allocates subcontracted work in its own cost breakdown block.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

There are two methods for modeling subcontracting work for production operations. These methods differ in the way that the subcontracting process can be modeled, the way that semi-finished products are represented in the process, and the way that cost control is managed.

*

Subcontracting of route operations in production orders or batch orders The service product must be a stocked product, and it must be part of the BOM. This method supports first in, first out (FIFO) or standard cost. Semi-finished products

are represented by the service product in the process. Cost control allocates the costs that are associated with subcontracted work to the material costs.

*

Subcontracting of production flow activities in a lean production flow The service is a non-stocked service product, and it isn\\'t part of the BOM. This method uses purchase agreements as service agreements.

This method uses backflush costing.

This method allows for aggregated and asynchronous procurement. (Material flow is independent of the procurement

process.)

Cost control allocates subcontracted work in its own cost breakdown block.

**QUESTION 3**

A manufacturing company has a new speaker that is available with standard and premium carbon fiber options.

For the premium option, speakers are made to order. Customers can choose from seven product attributes at different prices.

You need to create and configure the product and pricing for the new speaker.

Solution: Create a dimension-based product master with variants and use the trade agreements to specify the different pricing.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

**QUESTION 4**

You work for a gem wholesaler that sells raw diamonds. Diamonds are purchased and sold in individual boxes but weighed and inventoried in carats.

You are setting up a catch weight item for diamonds. Each box of diamonds must be tracked by its individual container weight.

You need to set up this item as a full visibility catch weight item. Which two steps must you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Assign it a Serial number group with per qty. defined as 1.

B. Assign the item a Tracking dimension group with active serial number control.

C. Create an inter-class unit of measure conversion between boxes and carats.

D. Assign a Tracking dimension group with batch number as the only active tracking dimension.

Correct Answer: BC

visibility

**QUESTION 5**

A manufacturing plant uses Lean process. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

1.) Create a purchase agreement for the subcontracting vendor that contains the pricing information for SP-01

2.) Create a vendor resource and a work cell for outsourced painting, then add the resource to the work cell 3.) Create a production flow process activity using the painting work cell and the service item as the picking activity 4.) Create a service term on the activity to tie the purchase agreement to the activity

Does this solution meet the goal?

A. Yes

B. No

Correct Answer: A
