QUESTION 1

A company uses Dynamics 365 Commerce.

The company wants to introduce a restriction that prevents all product labels from being generated automatically when product prices are updated.

You need to implement the restriction.

What should you do?

A. Disable the print option in Bar codes.

B. Configure product labels in Released products

C. Configure the product label report in the Commerce module

D. Set the Product label to None in the Commerce shared parameters

Correct Answer: D

QUESTION 2

A company has recently deployed Microsoft Dynamics 365 Finance. You have been hired as a Systems Administrator. Your role will include the management of the Dynamics 365 system.

You need to configure the account structure.

For the Business Unit dimension, you need to ensure that all values and blank values are allowed.

Which of the following values should you include for the business unit dimension?

A. * (asterisk)

B. ALL

C. *; " " (asterisk and quotation marks separated by a comma)

D. *; " " (asterisk and quotation marks separated by a semicolon)

Correct Answer: D

QUESTION 3

You are developing a new Dynamics 365 Finance system for your company.

You want to create test plans that members of your team can use to test code during the development of the system.

You want to use a utility that will track and document test plans, as well as issues and their remediations.

What utility should you use?

A. Task recorder for Finance and Operations apps

B. Business process modeler (BPM) Library

C. Microsoft Azure DevOps

D. Microsoft Power Platform.

E. Configuration data manager

Correct Answer: C

QUESTION 4

HOTSPOT

A company uses Dynamics 365 Commerce.

The company implements new pricing scenarios that relate to tax and discount changes. Default validation rules in the commerce application are no longer applicable.

You need to apply certain rules to avoid differences during retail statement calculation.

Which validation rules should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Rule validation type	Validation rule
Transaction level	▼

Manual line discounts compound on top of system discounts.
Manual line discounts replace system discounts.
Sales tax group and item tax group combination results in a valid tax intersection.
Tax included in price is consistent across transaction header and tax transactions.

Line level	▼

Manual line discounts compound on top of system discounts.
Manual line discounts replace system discounts.
Sales tax group and item tax group combination results in a valid tax intersection.
Tax included in price is consistent across transaction header and tax transactions.

Correct Answer:

Answer Area

Rule validation type	Validation rule
Transaction level	▼

> Manual line discounts compound on top of system discounts.
> Manual line discounts replace system discounts.
> **Sales tax group and item tax group combination results in a valid tax intersection.**
> Tax included in price is consistent across transaction header and tax transactions.

Line level	▼

> Manual line discounts compound on top of system discounts.
> **Manual line discounts replace system discounts.**
> Sales tax group and item tax group combination results in a valid tax intersection.
> Tax included in price is consistent across transaction header and tax transactions.

Box 1: Sales tax group and item tax group combination results in a valid tax intersection

Tax group assignment - This rule validates that the combination of the sales tax group and the item tax group produces a valid tax intersection.

Box 2: Manual line discounts replace system discounts
