QUESTION 1

DRAG DROP

User1 and User2 use a form named F1 to enter account data. Both users have the same security role, SR1, in the same business unit.

User1 has a business rule to make the main phone mandatory if the relationship type is Reseller. User2 must occasionally create records of the Reseller type without having the reseller's phone number and is blocked by User1's business

rule.

You need to ensure that User2 can enter reseller data into the system.

Which three actions should perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct order you select.

Select and Place:

Actions	Answer Area
Copy the security role as SR2. Assign the SR2 security to User2 and remove the original security role SR1.	
Open form F1 and save it as a form named F2.	
Remove the business role from form F2.	
Set the SR1 security role to be the only role for form F1 and the SR2 role to be the only role for form F2.	
Create a business rule for form F2 to make the phone number optional for resellers.	

Correct Answer:

Actions	Answer Area
Copy the security role as SR2. Assign the SR2 security to User2 and remove the original security role SR1.	Open form F1 and save it as a form named F2
	Remove the business role from form F2.
	Create a business rule for form F2 to make the phone number optional for resellers.
Set the SR1 security role to be the only role for form F1 and the SR2 role to be the only role for form F2.	

QUESTION 2

A financial services company uses the Common Data Service (CDS) to develop solutions. The company uses development and production instances.

You need to move solutions from the development instance to the production instance.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Export all managed solutions from the development instance and import the solutions into the production instance.
- B. In the development instance, make changes to the solutions that are deployed in the production instance, export the solutions as managed solutions, and import the managed solutions into the production instance.
- C. In the production instance, import solutions with the same version number or higher when updating solutions.
- D. In the development instance, highlight the solution you want to make changes to, select Clone a Path, make changes, export the solution, and import the solution into the production instance.

Correct Answer: CD

QUESTION 3

HOTSPOT

A company is building a new model-driven app.

The app must integrate with a number of on-premises and cloud solutions. No VPNs are in place.

You need to determine the method for each integration.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Integration

Outbound synchronous calls to a third-party Web API service

Calls to and from a website hosted in Azure with high peak loads

Outbound calls to multiple on-premises and cloud systems to notify of customer address changes.

Method

	▼
Webhook	
Microsoft Flow	
Azure Event Hub	
Azure Service Bus	

	▼
Plug-in	
Webhook	
Azure Event Hub	
Azure Service Bus	

	▼
Plug-in	
Azure Event Hub	
Webhook	

Correct Answer:

Answer Area

Integration	Method
Outbound synchronous calls to a third-party Web API service	<ul style="list-style-type: none">WebhookMicrosoft FlowAzure Event HubAzure Service Bus
Calls to and from a website hosted in Azure with high peak loads	<ul style="list-style-type: none">Plug-inWebhookAzure Event HubAzure Service Bus
Outbound calls to multiple on-premises and cloud systems to notify of customer address changes.	<ul style="list-style-type: none">Plug-inAzure Event HubWebhook

Box 1: Webhook

With Common Data Service, you can send data about events that occur on the server to a web application using webhooks. Webhooks is a lightweight HTTP pattern for connecting Web APIs and services with a publish/subscribe model.

Box 2: Azure Event Hub

Azure Event Hubs is a big data pipeline. It facilitates the capture, retention, and replay of telemetry and event stream data. The data can come from many concurrent sources.

It has the following characteristics:

1.
low latency
2.
capable of receiving and processing millions of events per second

3.

at least once delivery Box 3: Plugin Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/common-data-service/use-webhooks>

<https://docs.microsoft.com/en-us/azure/event-grid/compare-messaging-services>

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

An organization has an Azure SQL Database instance that must be synchronized daily with data from Dynamics 365 Sales. A large amount of data might need to be synchronized on some days.

You need to reduce the time required to synchronize data.

Solution:

1.

Write a SSIS package to connect to the source and target.

2.

Develop the SSIS package to find the records by the Modified on field.

3.

Create or update the records in the database instance based on results. Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Instead enable change tracking for entities that will be synchronized, and use the Data Export Service to sync data between the database and Dynamics 365 Sales.

Reference: <https://docs.microsoft.com/en-us/power-platform/admin/enable-change-tracking-control-data-synchronization>

<https://docs.microsoft.com/en-us/power-platform/admin/replicate-data-microsoft-azure-sql-database>

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one

correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A university has implemented Dynamics 365 Customer Engagement. Several departments use opportunity records to bid for funding for projects within their own departments.

Each department's opportunities are not visible to other departments. However, there are times when two departments need to work together on an opportunity.

You need to configure the security to meet the business requirements.

Solution: Share the individual opportunity that member of one department are working on with all members of the second department, and give those members the appropriate permissions.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Instead use access team templates and give access to members in the two departments.
