QUESTION 1

HOTSPOT

A company uses Dynamics 365 Sales and Power BI.

Sales managers must be able to keep track of changes to their pipeline in the following ways:

1.

Notify the sales managers when an Opportunity changes sales stage.

2.

Notify the sales managers when the pipeline drops below 2.5M USD.

3.

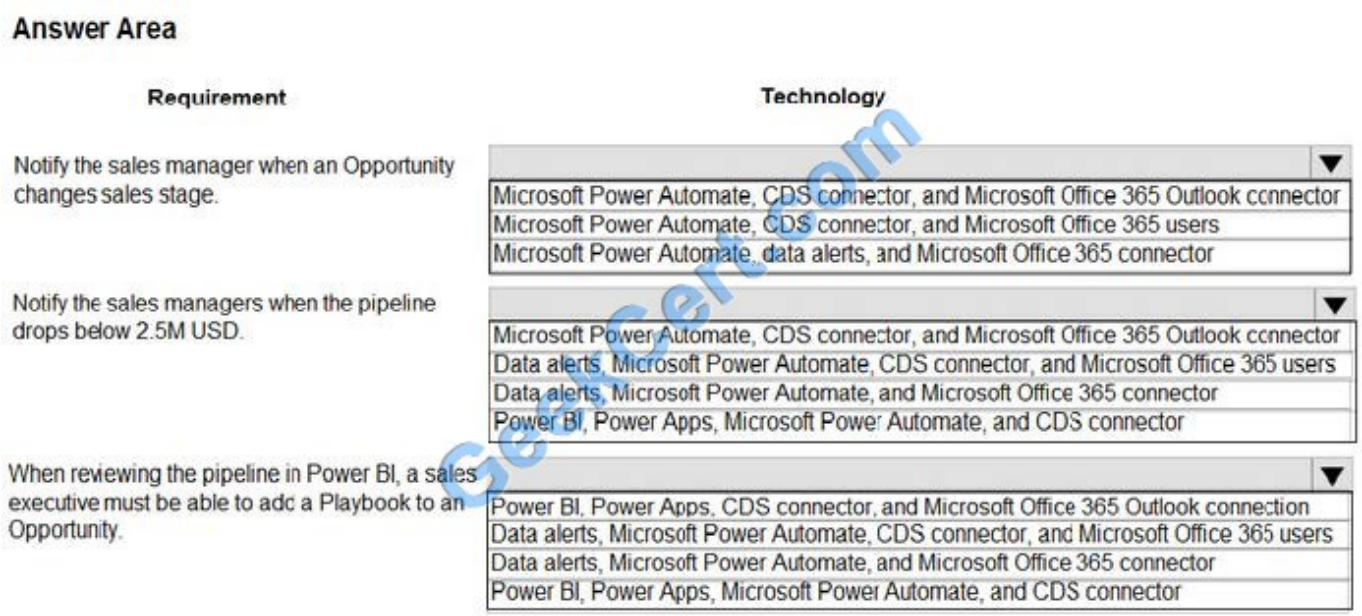
When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

You need to recommend a solution that meets the company requirements.

Which solution combination should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:



Correct Answer:

Answer Area

Requirement	Technology
Notify the sales manager when an Opportunity changes sales stage.	Microsoft Power Automate, CDS connector, and Microsoft Office 365 Outlook connector Microsoft Power Automate, CDS connector, and Microsoft Office 365 users Microsoft Power Automate, data alerts, and Microsoft Office 365 connector
Notify the sales managers when the pipeline drops below 2.5M USD.	Microsoft Power Automate, CDS connector, and Microsoft Office 365 Outlook connector Data alerts, Microsoft Power Automate, CDS connector, and Microsoft Office 365 users Data alerts, Microsoft Power Automate, and Microsoft Office 365 connector Power BI, Power Apps, Microsoft Power Automate, and CDS connector

QUESTION 2

DRAG DROP

You are designing a customer self-service Power Apps portal for Dynamics 365 Sales.

The portal will contain thousands of image files that are associated with the customer order histories.

The portal must meet the following requirements:

All image files must be hosted in the portal.

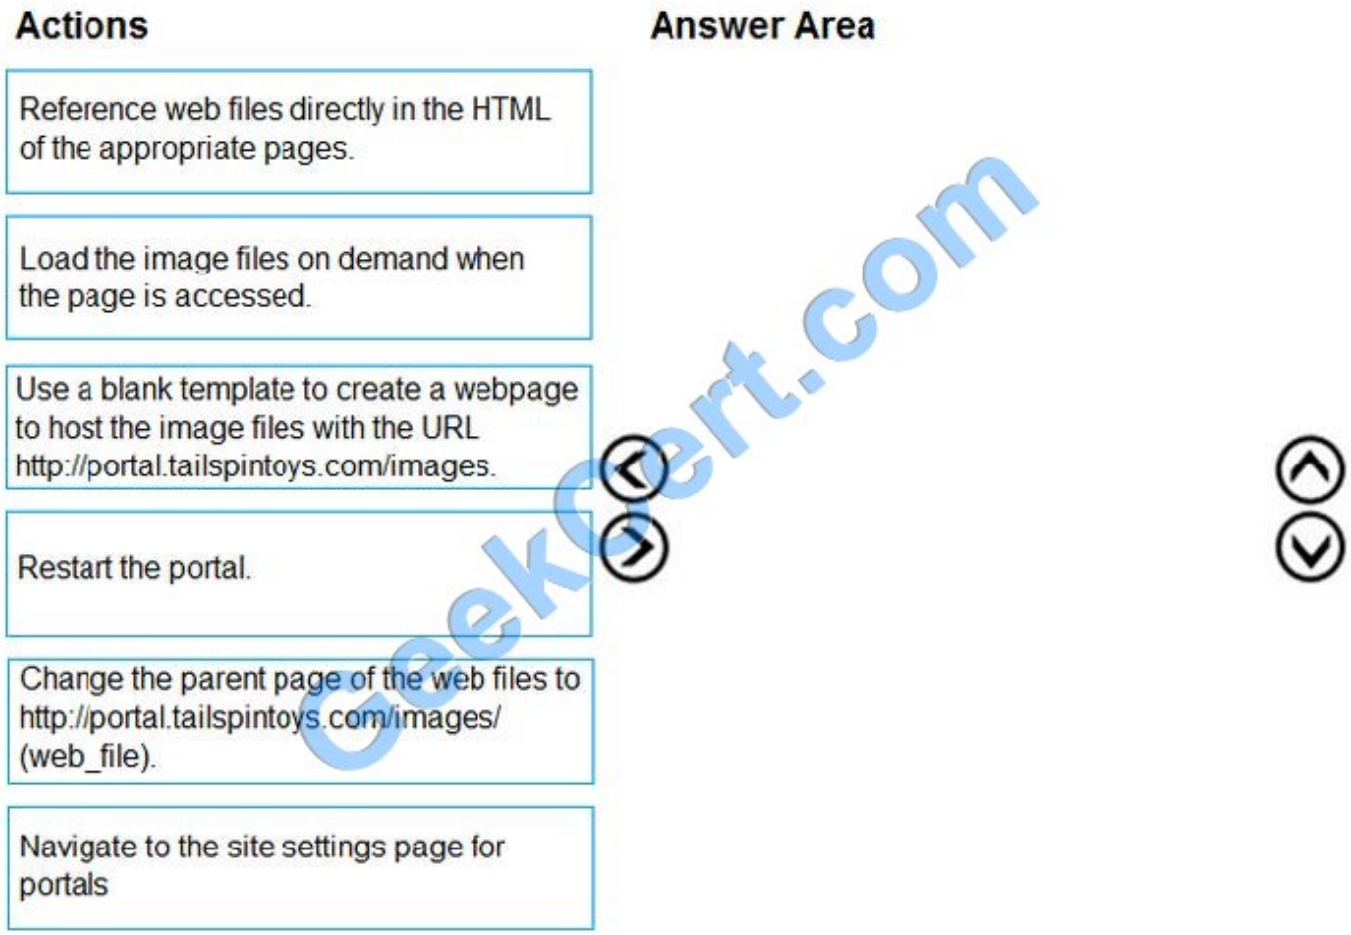
The portal must use the URL http://portal.tailspintoys.com/.

Performance issues must be minimized when loading the portal page.

You need to recommend a process for the company.

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:



Correct Answer:

QUESTION 3

HOTSPOT

You need to recommend the technology that matches the requirement.

Which component should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

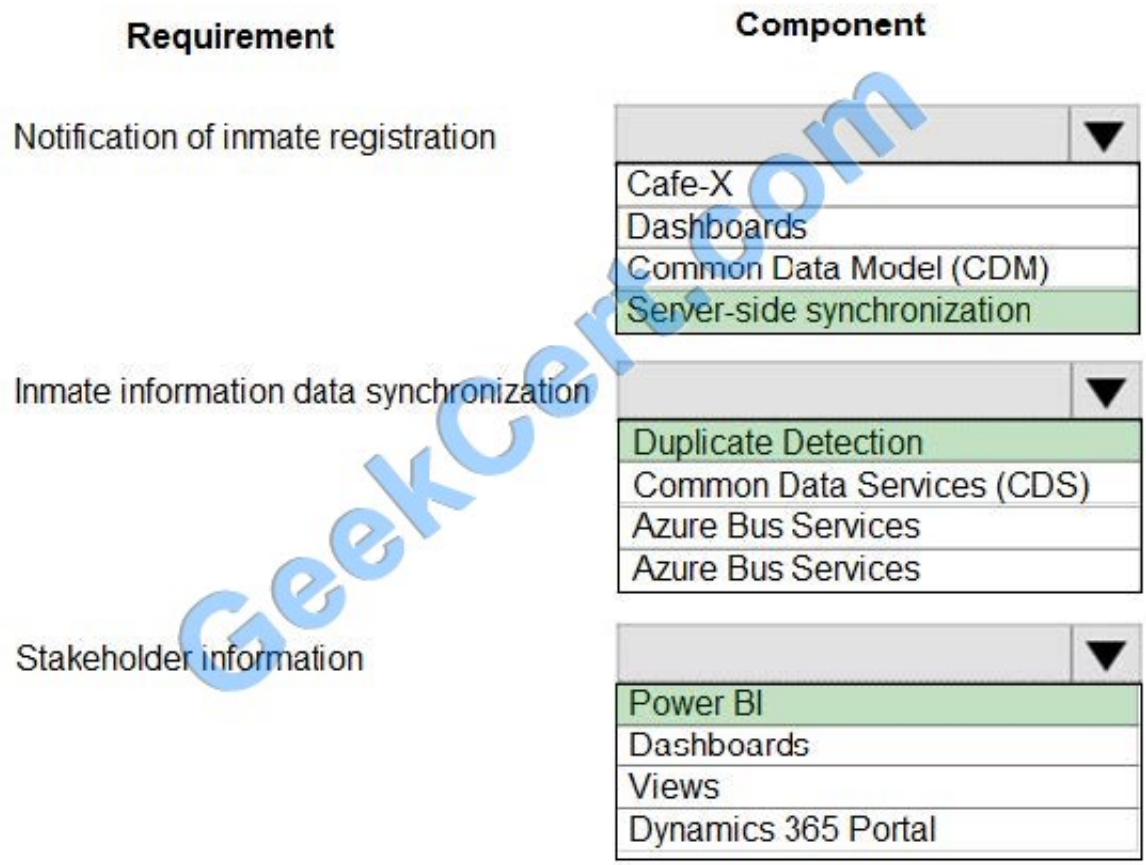
Answer Area

Requirement	Component
Notification of inmate registration	Cafe-X Dashboards Common Data Model (CDM) Server-side synchronization
Inmate information data synchronization	Duplicate Detection Common Data Services (CDS) Azure Bus Services Azure Bus Services
Stakeholder information	Power BI Dashboards Views Dynamics 365 Portal

GeekCert.com

Correct Answer:

Answer Area



Employees use a proprietary database to look up inmate information to enter in Microsoft Excel spreadsheets.

1.

All inmate information needs to be brought into the new system from the proprietary database and kept in sync.

2.

Once an inmate is registered, an email needs to be sent to the inmate.

3.

The chiefs want stakeholders to be able to see reports without needing to log in to Dynamics 365

QUESTION 4

DRAG DROP

You need to ensure that data security requirements are met.

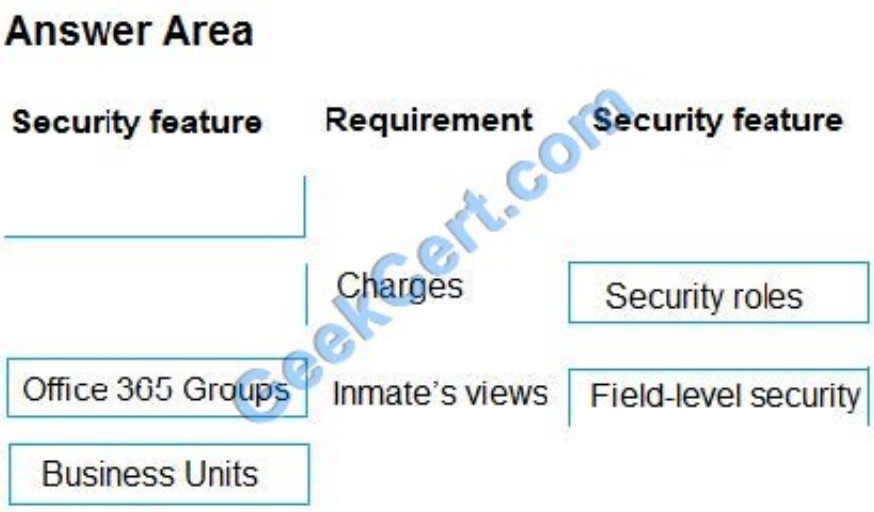
Which security feature should you recommend? To answer, drag the appropriate features to the correct requirements. Each security feature may be used once, more than once, or not at all. You may need to drag the split bar between panes

or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Correct Answer:



Explanation:

1.

The chiefs want stakeholders to be able to see reports without needing to log in to Dynamics 365

2.

Only the chiefs should be able to see the charges against the inmates.

3.

Inmates will not continue to upload homework to SharePoint, but the homework needs to be accessible within Dynamics 365.

4.

Inmates must see only the registration form when registering for a class.

5.

Chiefs should see all registration forms.

Charges: Security roles

A security role defines how different users, such as salespeople, access different types of records. To control access to data, you can modify existing security roles, create new security roles, or change which security roles are assigned to

each user. Each user can have multiple security roles.

Security role privileges are cumulative: having more than one security role gives a user every privilege available in every role.

Each security role consists of record-level privileges and task-based privileges.

Inmate\\'s views: Field-level security

Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system

administrator performs the following tasks.

1.

Enable field security on one or more fields for a given entity.

2.

Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.
