QUESTION 1

A company uses a legacy finance application that runs on a single SQL Server instance. The company plans to implement Dynamics 365 Finance. The following table describes the current implementation and design decisions for the new implementation:

Feature	Current application	Dynamics 365 implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

You need to identify the gap in the migration plan. Which requirement should you identify as a gap?

- A. Business logic
- B. Users
- C. User Interface
- D. Reports
- E. Data

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/office365/enterprise/add-several-users-at-the-same-time>

QUESTION 2

HOTSPOT

A company is implementing Dynamics 365 Supply Chain Management. The company is enrolled in the FastTrack program.

A project manager who is building a project plan needs to know which workshops discuss specific topics.

You need to identify the workshops in which each topic discussed.

Which workshop is used for each topic? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Topic

Workshop

Business process

	▼
Go-live Readiness	
Implementation	
Solution Blueprint Review	

Integration

	▼
Go-live Readiness	
Solution Blueprint Review	

Cutover

	▼
Go-live Readiness	
Implementation	
Solution Blueprint Review	

Correct Answer:

Topic	Workshop
Business process	
	Go-live Readiness
	Implementation
	Solution Blueprint Review
Integration	
	Go-live Readiness
	Solution Blueprint Review
Cutover	
	Go-live Readiness
	Implementation
	Solution Blueprint Review

Box 1: Solution Blueprint Review

A Solution Blueprint Review workshop serves as the starting point of Success by Design. The Solution Blueprint Review workshop covers the following topics:

Program strategy

Application strategy

Data strategy

Integration strategy

Test strategy

*-> Business process strategy

Security strategy

Application lifecycle management strategy

Environment and capacity strategy

Intelligence strategy

Box 2: Go-live Readiness

The Go-live Readiness workshop is designed to help guarantee a successful go-live for Dynamics 365 projects.

Here are some of the topics the workshop is likely to cover:

Confirmation of the go-live date and scope

Solution acceptance and user training

Performance

*-> Integrations

Code management

Configuration management

Review of blocking issues

Cutover plan and final data migration

Risk and mitigation review

Customer go/no-go criteria

Support process and hyper-care plan

Box 3: Implementation

Cutover is part of Implementation.

Note: Cutover strategy

Ensure that the cutover strategy provides a good approach and plan to deliver a well-defined, well-tested, reliable, and safe transition from current systems to the new production systems.

Agenda topics:

Cutover vision and strategy

Cutover project plan

Go-live cutover plan

Post go-live plan

Mandatory attendees are cutover lead, solution architect, data migration lead, and project manager roles. Recommended attendees include stakeholders from the customer and partner teams.

QUESTION 3

A company uses Dynamics 365 finance and operations apps.

The company is creating a detailed One Version strategy for applying updates to different environments through Lifecycle Services (LCS).

You need to identify which environment can receive automatic updates from Microsoft.

Which environment should you select?

- A. Microsoft Dataverse environment deployed through LCS
- B. Microsoft-managed environment deployed through LCS
- C. Local VHD development environment downloaded from OneDrive
- D. Local VHD development environment downloaded from LCS

Correct Answer: B

Apply updates to cloud environments

We describe how you can use Microsoft Dynamics Lifecycle Services (LCS) to automatically apply updates to cloud environments.

Supported environments

All customer-managed and Microsoft-managed environments deployed through Lifecycle Services are supported.

This question..

Has the following correct answers:

*

Customer-managed environment deployed through LCS

*

Microsoft-managed environment deployed through LCS Has the following incorrect answers:

*

Local VHD development environment downloaded from LCS

*

Local VHD development environment downloaded from OneDrive

*

Microsoft Azure-hosted VHD development environment downloaded from LCS

*

Microsoft Dataverse environment deployed through LCS

*

Multiple box testing environment hosted in Microsoft Azure

QUESTION 4

HOTSPOT

A company plans its Dynamics 365 finance and operations apps implementation.

The implementation must do the following:

1.

Use an agile methodology.

2.

Follow Microsoft's recommendations for checks and balances.

3.

Align with FastTrack touchpoints.

FastTrack touchpoints must be identified and included in the implementation timeline.

You need to integrate FastTrack checks and balances into the implementation methodology.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

FastTrack component

Tool

Checks and balances tool

Microsoft Dynamics Sure Step
Lifecycle Services (LCS)
Success by Design
Microsoft Solutions framework (MSF)

Touchpoints

Phase gate reviews
Readiness assessments
TechTalks
Workshops

Correct Answer:

Answer Area

FastTrack component

Tool

Checks and balances tool

Microsoft Dynamics Sure Step
Lifecycle Services (LCS)
Success by Design
Microsoft Solutions framework (MSF)

Touchpoints

Phase gate reviews
Readiness assessments
TechTalks
Workshops

Box 1: Success by Design

Follow Microsoft s recommendations for checks and balances.

Use an agile methodology.

Success by Design for Dynamics 365

Success by Design for Dynamics 365 systematically guides an implementation through a series of assessments at critical stages to ensure optimal architecture, security, performance, and user experience for a Dynamics 365 solution. The

framework is designed around three core principles:

Early discovery

Proactive guidance

Predictable success

Note: Agile is an iterative and collaborative process of applying process and controls to achieve the objective. This methodology is popularly embraced by product development enterprises and can be used for implementing Dynamics 365

solutions.

Box 2: Workshops

Align with FastTrack touchpoints.

FastTrack for Dynamics 365 offering

QUESTION 5

DRAG DROP

A company is implementing Dynamics 365 Supply Chain Management.

The company has invested in new production equipment.

You need to plan for the production equipment to be regularly serviced.

What should you do? To answer, drag the appropriate functions to the correct requirements. Each function may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Actions

Requirement

Action

Create a work order.

Calculate a cost sheet.

Schedule a service
order.

Calculate a maintenance
schedule cost.

Estimate the servicing costs.

Schedule repair jobs.

Correct Answer:

Answer Area

Actions

Calculate a cost sheet.

Schedule a service order.

Requirement

Estimate the servicing costs.

Schedule repair jobs.

Action

Calculate a maintenance schedule cost.

Create a work order.

Box 1: Calculate a maintenance schedule cost Estimate the servicing costs.

Maintenance schedule cost In Asset Management, you can calculate budget costs on maintenance schedule lines. This is useful if you want to get an overview of expected costs, for example, costs relating to planned preventive maintenance jobs for the next year. The calculations are based on existing maintenance schedule lines of type "Maintenance plans" and "Maintenance rounds" and "Maintenance requests".

Box 2: Create a work order Schedule repair jobs.

After you\\'ve scheduled preventive maintenance jobs, the next step is to create work orders for them. You can complete this step by using one of the maintenance schedules. The scheduled jobs in a maintenance schedule can have different reference types

Note: Dynamics 365 Supply Chain Management, Scheduled work order maintenance jobs The Scheduled work order maintenance jobs page shows an overview of the work orders allocated to a resource. Work orders using resource types "Human resources", "Tool", and "Machine" are shown. For example, if a maintenance worker calls in sick, you can use this page to quickly find work orders allocated to the worker, and then allocate another maintenance worker to the job.
