QUESTION 1

You need to recommend a solution tor tracking business process test steps. What should you recommend?

A. Microsoft Azure DevOps

B. Data Migration Framework

C. Selenium Automation Framework

D. Microsoft SharePoint

Correct Answer: A

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Disable and enable page locks and lock escalation.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 3

HOTSPOT

A mining company is upgrading their system to Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

You need to determine which functionality of the Dynamics 365 suite meets each requirement.

Which functionality should you implement for each requirement? To answer, select the appropriate options from the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Functionality
Track maintenance on mining machines and equipment.	Asset Management / Fixed Assets / Field Service
Capture costs for each of the mine locations for capitalization opportunities.	Project Management and Accounting / Fixed Assets / Inventory dimension site

Correct Answer:

Requirement	Functionality
Track maintenance on mining machines and equipment.	**Asset Management** / Fixed Assets / Field Service
Capture costs for each of the mine locations for capitalization opportunities.	Project Management and Accounting / **Fixed Assets** / Inventory dimension site

Correct Answer:

Answer Area

Issue	Option

Vendors with multiple ship to addresses.

▼
Business address
Invoice-to account
Vendor group
Vendor posting profile

International and domestic customer receivables.

▼
Customer group
Customer segment
Default dimensions
Financial dimensions

QUESTION 5

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Create separate departments to manage functional areas.

B. Create separate business units.

C. Create separate cost centers to manage operations.

D. Create separate value streams for item management.

Correct Answer: BC

Operating units An operating unit is an organization that is used to divide the control of economic resources and operational processes in a business. People in an operating unit have a duty to maximize the use of scarce resources, improve processes, and account for their performance.

The operating units in finance and operations apps are:

(B)

Business unit - A semi-autonomous operating unit that is created to meet strategic business objectives. It is used for financial reporting that is based on industries or product lines that the organization serves independently of legal entities.

(C)

Cost center - An operating unit in which managers are accountable for budgeted and actual expenditures. It is used for the management and operational control of business processes that span legal entities.
