**QUESTION 1**

HOTSPOT

A company uses Dynamics 365 Supply Chain Management.

A user reports an error on a transaction in the production environment that occurred 30 days ago.

You need to move the current data from the production environment to the sandbox environment to troubleshoot the transaction error. You must back up the sandbox environment before you copy data to the production environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

| Requirement | Action |
|---|---|
| Back up the current sandbox environment data. | Export database |
| | Import database |
| | Point-in-time restore |
| | Refresh database |
| Move data from the production environment to the sandbox environment. | Point-in-time restore |
| | Refresh database |
| | Rollback |

Correct Answer:

| Requirement | Action |
|---|---|
| Back up the current sandbox environment data. | **Export database** <br> Import database <br> Point-in-time restore <br> Refresh database |
| Move data from the production environment to the sandbox environment. | Point-in-time restore <br> **Refresh database** <br> Rollback |

Box 1: Export database Export a database Dynamics Lifecycle Services (LCS) to export a database from a sandbox user acceptance testing (UAT) environment to the Asset library.

After the export operation completes successfully, sign out of the servicing operation on your Environment details page. You can then see the asset in your Asset Library in the Database backups section.

### Asset library

| Select asset type | Database backup files |
|---|---|
| EPM artifact (2) | + ✎ 🗑 IMPORT Copy SAVE TO MY LIBRARY VERSIONS |
| Cortana intelligence application (0) | |
| Data package (0) | ✓ Name Valid Version Scope Status Release candidate Modified date Size |
| **Database backup (1)** | ✓ E2ETestUATbackup 1 Project Draft 11/30/2018 722 MB |
| Downloadable VHD (0) | |
| Dynamics 365 for Retail SDK (0) | |
| GER Configuration (1) | |
| Localized financial report (0) | |

Graphical user interface, text, application, Word The .bacpac files are stored here and can be manually downloaded to your Tier 1 developer environments for import.

Box 2: Refresh database Refresh database You can use Microsoft Dynamics Lifecycle Services (LCS) to perform a refresh of the database to a sandbox user acceptance testing (UAT) environment. A database refresh lets you copy the transactional and financial reporting databases of your production environment into the target, sandbox UAT environment. If you have another sandbox environment, you can also copy the databases from that environment to your target, sandbox UAT environment.

**QUESTION 2**

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.

The company\\'s main priorities are uninterrupted factory and distribution center operations, master data management, financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement the manufacturing factories\\' operations and distribution center operations on-premises and replicate the data to a Microsoft data center.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

---

**QUESTION 3**

A local art school is considering a new Dynamics 365 Finance cloud implementation.

The school needs to select a system authentication type.

Which two setup options does the implementation require? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Use a valid Azure Active Directory (Azure AD) account.

B. Use a valid Active Directory account

C. UseOAuth.

D. Use assigned roles.

E. Use an enabled Dynamics 365 Finance user.

Correct Answer: AE

---

**QUESTION 4**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations. Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create two legal entities, one for advanced warehouse and one for basic warehouse.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

You cannot have two default currencies in the same legal entity.

QUESTION 5

HOTSPOT

You need to recommend a site and warehouse configuration.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

## Answer Area

**Configuration**                      **Solution**

**Warehouse type**

| One advanced site, configure items for scanning |
| One basic warehouse, one advanced warehouse |
| Two basic warehouses, configure items for scanning |
| Two basic warehouses, no item configuration for scanning |

**Financial tracking**

| Item |
| License plate |
| Location |
| Warehouse |

Correct Answer:

## Answer Area

**Configuration**                    **Solution**

Warehouse type

| One advanced site, configure items for scanning |
| One basic warehouse, one advanced warehouse |
| Two basic warehouses, configure items for scanning |
| Two basic warehouses, no item configuration for scanning |

Financial tracking

| Item |
| License plate |
| Location |
| Warehouse |
