- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

A company uses Dynamics 365 Supply Chain Management.

The system has a slow response time when sales orders are entered.

You need to identify any blocking SQL statements.

Which Lifecycle Services (LCS) tool should you use?

- A. SQL Insights - Live View
- B. SQL Insights - Index Analysis
- C. Telemetry data monitoring
- D. Performance SDK

Correct Answer: A

All SQL performance tools in LCS are available under the SQL Insights tab on the Environment Monitoring page for a specific environment. The following tabs are available:

Live View -Shows executing statements and blocking statements. The current SQL Now page that shows performance issues will be replaced with Live View. Index Analysis -Shows aggregated index and table information, based on user

scans, user seeks, user updates, and row count. Like performance metrics, this tool shows the trend for the selected index along with additional table metrics. This feature is not available in self-service environments.

Queries -Shows a list of predefined queries that can be used to retrieve metrics on demand. Examples of queries include a current blocking tree, a list of active plan guides, and a list of most expensive queries.

Etc.

### QUESTION 2

Fourth Coffee plans to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company owns and operates the following divisions:

Division	Action
Production	Packages and roasts coffee beans
Distribution	Delivers products to market

You need to ensure that Fourth Coffee can report financial results by division. Which strategy should you recommend?

- A. Create two legal entities, create one warehouse and associate the financial dimension to the warehouse.
- B. Create one legal entity with one site that has two warehouses. Associate the financial dimensions to the

warehouses.

C. Create two legal entities, create one site and associate a financial dimension per company.

D. Create one legal entity with two sites. Associate financial dimensions to sites.

Correct Answer: D

Reference: <https://www.nexsoftsys.com/articles/financial-dimensions-in-dynamics-365-services.html>

### QUESTION 3

A customer is preparing to upgrade to a new version of Dynamics 365 Finance.

Unit testing is required prior to the upgrade.

You need to recommend a testing tool for unit testing.

Which tool should you recommend?

A. Regression suite automation tool

B. Business process modeler

C. SysTest

D. Data task automation

Correct Answer: C

Use SysTest Framework to author unit/component test code.

SysTest framework is Unit Test framework in Dynamics 365 for Finance and Operations, Enterprise edition. SysTest framework was available in the earlier version as well, and it provides developers the ability to write unit test code for the

business logic.

### QUESTION 4

#### HOTSPOT

A company implements Dynamics 365 finance and operations apps for its retail operations.

Unauthorized vendor checks have been created in the past resulting in check fraud.

The company must print a vendor aging report from a local printer in its headquarters location every week on Sunday night.

Every week on Monday, the comptroller must review the report and approve checks to issue to vendors.

You need to recommend a solution to meet the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Solution
Prevent check fraud.	<div><div>▼</div><div>Electronic reporting</div><div>Three-way matching</div><div>Dynamics 365 Fraud Protection</div><div>Positive pay</div></div>
Print the vendor aging report.	<div><div>▼</div><div>Document Routing Agent</div><div>Electronic reporting</div><div>Document reporting services</div><div>Print and Document Services</div></div>

Correct Answer:

## Requirement

## Solution

Prevent check fraud.

Electronic reporting  
Three-way matching  
Dynamics 365 Fraud Protection  
Positive pay

Print the vendor aging report.

Document Routing Agent  
Electronic reporting  
Document reporting services  
Print and Document Services

### Box 1: Positive Pay

Positive Pay within Dynamics AX is one of the easiest systems to put into place to help prevent check fraud and protect your business. Positive Pay generates an electronic file that you can submit to your bank with a list of your approved

checks, reducing the chance of processing any fraudulent checks.

### Box 2: Electronic reporting

Electronic reporting (ER) is a configurable tool that helps you create and maintain regulatory electronic reporting and payments.

You can use ER to configure formats for both incoming and outgoing electronic documents in accordance with the legal requirements of various countries and regions. ER lets you manage these formats during their lifecycle. For example, you

can adopt new regulatory requirements and generate business documents in the required format to electronically exchange information with government bodies, banks, and other parties.

The ER engine is targeted at business users instead of developers. Because you configure formats instead of code, the processes for creating and adjusting formats for electronic documents are faster and easier.

## QUESTION 5

### HOTSPOT

You need to recommend solutions to meet the CIO's requirements (or the customers and the roadmap).

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Location
Structure customers for the roadmap.	<div><div>Data management framework</div><div>Azure Data Lake Storage Gen2</div><div>Azure Data Lake Storage Gen1</div><div>Microsoft Power Platform</div><div>Data management framework</div></div>
Match old customer IDs to new IDs.	<div><div>Common Data Model folder</div><div>Common Data Model folder</div><div>Data management framework</div><div>Microsoft Power Platform</div></div>

Correct Answer:

Requirement	Location
Structure customers for the roadmap.	<div><div>Data management framework</div><div>Azure Data Lake Storage Gen2</div><div>Azure Data Lake Storage Gen1</div><div>Microsoft Power Platform</div><div>Data management framework</div></div>
Match old customer IDs to new IDs.	<div><div>Common Data Model folder</div><div>Common Data Model folder</div><div>Data management framework</div><div>Microsoft Power Platform</div></div>

Structure customers for the roadmap --- Data management framework Match old customer IDs to new IDs --- Common Data Model folder
