QUESTION 1

You have a Dynamics CRM development environment and a Dynamics CRM production environment.

You have a project solution in the development environment.

You need to import the solution to the production environment as a managed solution.

What should you do?

- A. Change the options of the Import Solution dialog box to import the solution as managed.
- B. Use the Package Deployer for Microsoft Dynamics CRM to import the unmanaged solution to CRM as managed.
- C. Ask a developer to change the options of the import API so that CRM imports the unmanaged solution as managed.
- D. Export an unmanaged solution and select Managed for the package type. Import the exported solution to the production environment.

Correct Answer: D

QUESTION 2

You plan to create a field that will store email addresses.

You need to ensure that a user can send an email message by clicking the email address in the new field.

Which type of data should you use for the field?

- A. Lookup
- B. Two Options
- C. Single Line of Text
- D. Option Set

Correct Answer: C

QUESTION 3

You have a Dynamics CRM development environment and a Dynamics CRM production environment. In both environments, your account is assigned the System Customizer security role.

In the development environment, you create a custom solution that contains all of the project components deployed to the production environment. The custom solution contains an entity.

In the development environment, you open the project solution that you intend to deploy to the production environment.

You see the entity, but not the field.

You need to ensure that you can modify the field in the development environment.

What should you do?

- A. Ask the system administrator to assign your user the System Administrator security role, and then modify the system field.
- B. In the project solution, add a field to the entity, and then make the modification.
- C. In the default solution, make the modification.
- D. Use the Add Sub Components action, add the field, and then make the modification.

Correct Answer: C

QUESTION 4

You have a Dynamics CRM organization that contains the business units configured as shown in the following table.

Business unit name	Parent
Default	Not applicable
Businessunit1	Default
Businessunit2	Businessunit1
Businessunit3	Businessunit2
Businessunit4	Businessunit3

You configure Businessunit2 to have the Default business unit as a parent, You need to identify which business unit is now the parent of Businessunit4. Which business unit should you identify?

- A. Default
- B. Businessunit2
- C. Businessunit3
- D. Businessunit1

Correct Answer: A

QUESTION 5

You import a managed solution to a Dynamics CRM organization. The solution contains a new entity named Loan. The Loan entity is not referenced by any other solutions in the organization.

After a few months, the decision is made to stop using the solution.

You need to identify what will occur to the entity definition and the entity data if you attempt to delete the solution.

What should you identify?

- A. The solution will be deleted, but the entity data will remain for historical reference.
- B. You will be prevented from deleting the solution.
- C. You will be prompted to export a copy of the data during the delete process.
- D. The entity definition and the entity data will be deleted.

Correct Answer: A
