### QUESTION 1

You are planning to give a presentation on Microsoft Dynamics AX to your development team. What should you state as an advantage of creating and using labels?

- A. decreases database references
- B. provides multi-language and translation support
- C. reduces the number of pointers
- D. duplicates the value throughout the database

Correct Answer: D

---

### QUESTION 2

You are developing a form that allows users to update an order status. You create a table named Table1 that you will use as a data source for this form.

You want to include a radio-button style selection so that the end user can choose between three different order statuses: "Canceled", "Delivered", "Processing".

What should you add to Table1 so that you can add the radio button selection to the form?

- A. three different string fields that represent each order status
- B. three different Extended Data Types (EDTs) of type string with each order status
- C. a Boolean data type with values that represent each choice
- D. a base enumeration with three elements that represent each order status

Correct Answer: A

---

### QUESTION 3

You create a privilege to maintain vendor information.

To which two elements can you add the privilege? Each correct answer presents part of the solution.

- A. policies
- B. roles
- C. duties
- D. permissions

Correct Answer: BC

---

#### QUESTION 4

You are writing a function "SumOfInt(n)" that returns the sum of numbers from 0 to n as shown in the following exhibit:

$$\text{SumOfInt}(1) = 0 + 1 = 1$$

$$\text{SumOfInt}(2) = 0 + 1 + 2 = 3$$

$$\text{SumOfInt}(n) = 0 + 1 + \dots (n-1) + n$$

The function prototype is the following: `public static int SumOfInt(int n)`

```
{  
  
}
```

Which two functions return the correct answer? Each correct answer presents a complete solution.

- A. `public static int SumOfInt(int n) { int total = 0; int i = 0; do { i++; total = total + i; } while (i <= n); return total; }`
- B. `public static int SumOfInt(int n) { int total = 0; int i = 0; while(i <= n) { total = total + i; i++; } return total; }`
- C. `public static int SumOfInt(int n) { int total = 0; int i = 0; do { i++; total = total + i; } while (i <= n); return total; }`
