QUESTION 1

You create a new table with the Valid Time State Field Type property set to Date. You add the table as a singular data source to a form, and create a display menu item that opens the form.

You add the menu item as an entry point to a new privilege and want to ensure that a role with the privilege can edit records without creating new records.

To achieve this goal, what is the minimum access level you should grant to the entry point?

A. Create

B. Delete

C. Correct

D. Update

Correct Answer: D

QUESTION 2

You are writing an X++ method.

You need to perform the same logic for multiple records in the database.

How should you iterate over multiple records in X++?

A. Declare an enumerator for the table, and call the moveNext() method to read each record.

B. Declare a RecordSortedList variable for the table, and use the next() method to read each record.

C. Declare a table buffer variable, and then write a "while select" statement to iterate through each record.

D. Declare a shared variable for the table, and use the next() method to read each record.

Correct Answer: C

---

QUESTION 4

You are working for a client in a new Microsoft Dynamics 365 for Finance and Operations environment.

The client requests that custom fields be added to the SalesTable table. You need to add them in a way to minimize the cost of maintenance and upgrading.

What should you do to add the custom fields?

A. Create a new model that overlayers the ApplicationSuite model.

B. Create a new package in the ApplicationSuite model.

C. Create a new extension model that references the ApplicationSuite model.

D. Create a new extension model that references the Application Platform model.

Correct Answer: C

QUESTION 5

What is an example of a best practice for creating base enumerations?

A. Use base enumerations when there is a variable number of user-defined outcomes.

B. Value of zero should be used as the default value for base enumerations.

C. Avoid accessing a constant by using an enumerator.

D. Avoid assigning labels to enumerations that have a default value.

Correct Answer: B
