QUESTION 1

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named UserA.

You have two computers named Computer1 and Computer2 that run Windows 10 and are joined to contoso.com.

You need to ensure that UserA can connect to Computer2 from Computer1 by using Remote Desktop.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. On Computer1, modify the registry.
- B. On Computer2, modify the registry.
- C. On Computer1, modify the properties of UserA.
- D. On Computer1, enable Remote Desktop.
- E. On Computer2, modify the properties of UserA.
- F. On Computer 2, enable Remote Desktop.
- G. On Computer2, add the Everyone group to the Remote Desktop Users group.
- H. On Computer1, add the Everyone group to the Remote Desktop Users group.

Correct Answer: EFG

QUESTION 2

HOTSPOT

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

You need to configure the NTFS permissions to meet the following requirements:

1.

All domain users must be able to open the files in the Templates folder.

2.

Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Correct Answer:

Answer Area

Inheritance: ▼

- Enable inheritance.
- Disable inheritance and remove permissions.
- Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

- Allow Read&Execute
- Deny Read&Execute
- Allow Modify
- Deny Modify

Permissions for Group1: ▼

- Allow Read&Execute
- Deny Read&Execute
- Allow Modify
- Deny Modify

QUESTION 3

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create the local users shown in the following table.

Name	Member of
User1	Users
User2	Users, Guests
User3	Power Users, Guest
User4	Guests, Users, Administrators
User5	Users, Distributed COM Users

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

Correct Answer: ADE

QUESTION 4

HOTSPOT

You have a computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users, Group1
User2	Administrators

Computer1 contains the folders shown in the following table.

Name	Path	Permission	Share permission
Folder1	D:\Folder1	Administrators: Full control Group1: Read	Group1: Full control
Folder2	E:\Folder2	Administrators: Full control	None

You move Folder1 into Folder2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area:

Statements	Yes	No
User1 can connect to Folder1 by using a path of \\Computer1\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>
User1 can read the content in E:\Folder2\Folder1 when the user signs in to Computer1.	<input type="radio"/>	<input type="radio"/>
User2 can connect to Folder1 by using a path of \\Computer1\E\$\Folder2\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area:

Statements	Yes	No
User1 can connect to Folder1 by using a path of \\Computer1\Folder1 UNC.	<input type="radio"/>	<input checked="" type="radio"/>
User1 can read the content in E:\Folder2\Folder1 when the user signs in to Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can connect to Folder1 by using a path of \\Computer1\E\$\Folder2\Folder1 UNC.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

If you move a shared folder, the share will no longer work.

Box 2: No

Folder1 will inherit the permissions of Folder2. User1 does not have permission to access Folder2.

Box 3: Yes

User2 is a member of the Administrators group so he can access the administrative share \\Computer1\E\$.

User2 has Full Control permission to Folder2 so he can access \\Computer1\E\$\Folder2. Folder1 will inherit the permissions of Folder2 so User2 can access \\Computer1\E\$\Folder2\Folder1.

QUESTION 5

HOTSPOT

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers.

The computers contain the users shown in the following table.

Computer name	User name	User password
Computer1	User1	P@ssword1
Computer1	User2	P@ssword2
Computer2	User1	P@ssword1
Computer2	User2	P@ssword2
Computer2	User3	P@ssword3

The computers contain the shared folders shown in the following table.

Computer name	Shared folder name	Permission
Computer1	Share1	Everyone – Read
Computer2	Share2	Everyone – Read

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
From Computer1, User1 can access Share2.	<input type="radio"/>	<input type="radio"/>
From Computer2, User2 can access Share1.	<input type="radio"/>	<input type="radio"/>
From Computer2, User3 can access Share1.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
From Computer1, User1 can access Share2.	<input checked="" type="radio"/>	<input type="radio"/>
From Computer2, User2 can access Share1.	<input checked="" type="radio"/>	<input type="radio"/>
From Computer2, User3 can access Share1.	<input checked="" type="radio"/>	<input type="radio"/>

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2. However, the Guest account is enabled which could provide access depending on

which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education

(from build 1709 onwards), the Guest account does not enable access to the shared folder.
