QUESTION 4

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

A. a Group Policy administrative template

B. Device Manager

C. Task Manager

D. Group Policy preferences

Correct Answer: D

You can\\'t manage all of the per-user service templates services using normal Group Policy management methods. Because the per-user services aren\\'t displayed in the Services management console, they\\'re also not displayed in the Group Policy Services policy editor UI.

In light of these restrictions, you can use the following methods to manage per-user services template services:

A combination of a security template and a script or Group Policy preferences registry policy Group Policy preferences for all of the services A script for all of the services
