### QUESTION 1

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You redirect Windows known folders to Microsoft OneDrive for Business.

Which folder will be included in the redirection?

- A. Saved Games
- B. Documents
- C. Music
- D. Downloads
- E. Favorites
- F. AppData
- G. Videos

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/onedrive/redirect-known-folders>

---

### QUESTION 2

Your company has a number of Windows 10 Microsoft Azure Active Directory (Azure AD) joined workstations. These workstations have been enrolled in Microsoft Intune.

You are creating a device configuration profile for the workstations. You have been informed that a custom image should be displayed on the sign-in screen.

Which of the following is a Device restriction setting that should be configured?

- A. Locked screen experience
- B. Personalization
- C. Display
- D. General

Correct Answer: B

Wallpaper image, or Desktop background picture, URL is set under Personalization.

### QUESTION 3

You have a Microsoft 365 tenant that uses Microsoft Intune for mobile device management (MDM).

You associate a Microsoft Store for Business account with Intune.

You purchase an app named Appl from the Microsoft Store for Business.

You need to ensure that Appl can be deployed by using Intune.

What should you do?

- A. Sync purchased apps from the Microsoft Store for Business.
- B. Integrate the Windows Autopilot Deployment Program into the Microsoft Store for Business.
- C. Create an app category in Intune.
- D. Create an app protection policy in Intune.

Correct Answer: A

Synchronize apps If you've already associated your Microsoft Store for Business account with your Intune admin credentials, you can manually sync your Microsoft Store for Business apps with Intune using the following steps.

1.

Select Tenant administration > Connectors and tokens > Microsoft Store for Business.

2.

Click Sync to get the apps you've purchased from the Microsoft Store into Intune.

Note: You can synchronize the list of apps you have purchased (or that are free) from the store with Intune.

Apps that are synchronized appear in the Intune administration console; you can assign these apps like any other apps.

Both Online and Offline licensed versions of Apps are synchronized to Intune. App names will be appended with "Online" or "Offline" in the portal.

### QUESTION 4

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune.

You plan to use Endpoint analytics.

You need to create baseline metrics.

What should you do first?

- A. Create an Azure Monitor workbook.

B. Onboard 10 devices to Endpoint analytics.

C. Create a Log Analytics workspace.

D. Modify the Baseline regression threshold.

Correct Answer: B

Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference:  
<https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

#### QUESTION 5

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). You have the Windows 10 devices shown in the following table.

| Name    | Active Directory | Endpoint Configuration Manager agent | Microsoft Intune | Azure AD   |
|---------|------------------|--------------------------------------|------------------|------------|
| Device1 | Joined           | Not installed                        | Enrolled         | Registered |
| Device2 | Not joined       | Installed                            | Enrolled         | Registered |
| Device3 | Not joined       | Not installed                        | Enrolled         | Joined     |
| Device4 | Joined           | Installed                            | Not enrolled     | Registered |
| Device5 | Not joined       | Installed                            | Not enrolled     | Joined     |
| Device6 | Joined           | Installed                            | Enrolled         | Joined     |

You need to ensure that you can use co-management to manage all the Windows 10 devices. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Join Device 1, Device2, and Device4 to Azure AD.

B. Unjoin Device3, Device5, and Device6 from Azure AD, and then register the devices in Azure AD.

C. Enroll Device4 and Device5 in Intune.

D. Join Device2, Device3, and Device5 to the domain.

E. Install the Endpoint Configuration Manager agent on Device1 and Device3.

Correct Answer: CE

Co-management enables you to concurrently manage Windows 10 devices by using both Configuration Manager and Microsoft Intune.

Co-management requires Configuration Manager version 1710 or later and enrollment in Microsoft Intune. Windows 10 devices must be hybrid Azure AD joined.
