QUESTION 1

You have a Microsoft 365 subscription.

You need to be notified if users receive email containing a file that has a virus.

What should you do?

- A. From the Exchange admin center, create a spam filter policy.
- B. From the Security and Compliance admin center, create a data governance event.
- C. From the Security and Compliance admin center, create an alert policy.
- D. From the Exchange admin center, create a mail-flow rule.

Correct Answer: D

You can inspect email attachments in your Exchange Online organization by setting up mail flow rules. Exchange Online offers mail flow rules that provide the ability to examine email attachments as a part of your messaging security and compliance needs. When you inspect attachments, you can then take action on the messages that were inspected based on the content or characteristics of those attachments.

Incorrect answers:

A: A spam filter policy includes selecting the action to take on messages that are identified as spam. Spam filter policy settings are applied to inbound messages.

B: A data governance event commences when an administrator creates it, following which background processes look for content relating to the event and take the retention action defined in the label. The retention action can be to keep or remove items, or to mark them for manual disposition.

QUESTION 2

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a Microsoft 365 subscription.

You have been tasked with making sure that managed iOS devices are prevented from copying and pasting company data from Microsoft Word documents to other apps.

Solution: You create a conditional access policy.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a new Microsoft 365 subscription.

You need to prevent users from sending email messages that contain Personally Identifiable Information (PII).

Solution: From the Exchange admin center, you create a data loss prevention (DLP) policy.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 4

You have a Microsoft 365 subscription.

From the subscription, you perform an audit log search, and you download all the results.

You plan to review the audit log data by using Microsoft Excel.

You need to ensure that each audited property appears in a separate Excel column.

What should you do first?

A. From Power Query Editor, transform the JSON data.

B. Format the Operations column by using conditional formatting.

C. Format the AuditData column by using conditional formatting.

D. From Power Query Editor, transform the XML data.

Correct Answer: A

After you search the Office 365 audit log and download the search results to a CSV file, the file contains a column named AuditData, which contains additional information about each event. The data in this column is formatted as a JSON object, which contains multiple properties that are configured as property:value pairs separated by commas. You can use the JSON transform feature in the Power Query Editor in Excel to split each property in the JSON object in the AuditData column into multiple columns so that each property has its own column. This lets you sort and filter on one or more of these properties

QUESTION 5

HOTSPOT

You configure a data loss prevention (DLP) policy named DLP1 as shown in the following exhibit.

Answer Area

Admin1 will receive [answer choice].

	▼
one notification	
five notifications	
ten notifications	
no notifications	

User1 will receive [answer choice].

	▼
one notification	
five notifications	
ten notifications	
no notifications	

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Admin1 will receive [answer choice].

	▼
one notification	
five notifications	
ten notifications	
no notifications	

User1 will receive [answer choice].

	▼
one notification	
five notifications	
ten notifications	
no notifications	

Correct Answer:

Choose the types of content to protect

This policy will protect that matches these requirements. You can choose sensitive info types and existing labels

Content contains *

Any of these ▼
