QUESTION 2

You have a Microsoft 365 E5 subscription. The subscription contains users that have the following types of devices:

Windows 10 Android OS

On which devices can you configure the Endpoint DLP policies?

- A. Windows 10 only
- B. Windows 10 and Android only
- C. Windows 10 and macOS Only
- D. Windows 10, Android, and iOS

Correct Answer: A

A. Endpoint data loss prevention (Endpoint DLP) extends the activity monitoring and protection capabilities of DLP to sensitive items that are physically stored on Windows 10/11 and macOS (the three latest released major versions) devices. Once devices are onboarded into the Microsoft Purview solutions, the information about what users are doing with sensitive items is made visible in activity explorer. You can then enforce protective actions on those items via DLP policies.
