QUESTION 1

You enable the Azure AD Identity Protection weekly digest email. You create the users shown in the following table.

Name	Role
Admin1	Security reader
Admin2	User administrator
Admin3	Security administrator
Admin4	Compliance administrator

Which users will receive the weekly digest email automatically?

- A. Admin2, Admin3, and Admin4 only
- B. Admin1, Admin2, Admin3, and Admin4
- C. Admin2 and Admin3 only
- D. Admin3 only
- E. Admin1 and Admin3 only

Correct Answer: E

By default, all Global Admins receive the email. Any newly created Global Admins, Security Readers or Security Administrators will automatically be added to the recipients list.

QUESTION 2

Your company has a Microsoft 365 subscription.

You need to identify all the users in the subscription who are licensed for Office 365 through a group membership. The solution must include the name of the group used to assign the license.

What should you use?

- A. Active users in the Microsoft 365 admin center
- B. Reports in Microsoft Purview compliance portal
- C. the Licenses blade in the Microsoft Entra admin center

D. Reports in the Microsoft 365 admin center

Correct Answer: D

Microsoft 365 Reports in the admin center

You can easily see how people in your business are using Microsoft 365 services. For example, you can identify who is using a service a lot and reaching quotas, or who may not need a Microsoft 365 license at all.

Which activity reports are available in the admin center Depending on your subscription, here are the available reports in all environments.

Report	Public	GCC	GCC-High	DoD	Office 365 operated by 21Vianet
Microsoft browser usage	Yes	No ¹	No ¹	No ¹	No ¹
Email activity	Yes	Yes	Yes	Yes	Yes
Email apps usage	Yes	Yes	Yes	Yes	Yes
Mailbox usage	Yes	Yes	Yes	Yes	Yes
Office activations	Yes	Yes	Yes	Yes	Yes

QUESTION 3

You have a Microsoft 365 tenant.

You plan to implement Endpoint Protection device configuration profiles.

Which platform can you manage by using the profile?

- A. Android
- B. CentOS Linux
- C. iOS
- D. Window 10

Correct Answer: D

QUESTION 4

HOTSPOT

You configure a data loss prevention (DLP) policy named DLP1 as shown in the following exhibit.

Choose the types of content to protect

This policy will protect that matches these requirements. You can choose sensitive info types and existing labels

Content contains

Any of these ▾

Sensitive info type	Match accuracy		
	min	max	
Credit Card Number	85	100	x

Retention labels

1 year x

Add ▾

+ Add group

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

DLP1 cannot be applied to [answer choice].

- Exchange email
- SharePoint sites
- OneDrive accounts

DLP1 will be applied only to documents that have [answer choice].

- both a credit card number and the 1 year label applied
- either a credit card number or the 1 year label applied
- between 85 and 100 credit card numbers

Correct Answer:

DLP1 cannot be applied to [answer choice].

▼
Exchange email
SharePoint sites
OneDrive accounts

DLP1 will be applied only to documents that have [answer choice].

▼
both a credit card number and the 1 year label applied
either a credit card number or the 1 year label applied
between 85 and 100 credit card numbers

QUESTION 5

You have a Microsoft 365 subscription.

You configure a new Azure AD enterprise application named App1. App1 requires that a user be assigned the Reports Reader role.

Which type of group should you use to assign the Reports Reader role and to access App1?

- A. a Microsoft 365 group that has assigned membership
- B. a Microsoft 365 group that has dynamic user membership
- C. a security group that has assigned membership
- D. a security group that has dynamic user membership

Correct Answer: C

To grant permissions to assignees to manage users and group access for a specific enterprise app, go to that app in Azure AD and open in the Roles and Administrators list for that app. Select the new custom role and complete the user or

group assignment. The assignees can manage users and group access only for the specific app.

Note: You can add the following types of groups:

Assigned groups - Manually add users or devices into a static group.

Dynamic groups (Requires Azure AD Premium) - Automatically add users or devices to user groups or device groups based on an expression you create.

Note:

Security groups

Security groups are used for granting access to Microsoft 365 resources, such as SharePoint. They can make administration easier because you need only administer the group rather than adding users to each resource individually.

Security groups can contain users or devices. Creating a security group for devices can be used with mobile device

management services, such as Intune.

Security groups can be configured for dynamic membership in Azure Active Directory, allowing group members or devices to be added or removed automatically based on user attributes such as department, location, or title; or device attributes such as operating system version.

Security groups can be added to a team.

Microsoft 365 Groups can't be members of security groups.

Microsoft 365 Groups

Microsoft 365 Groups are used for collaboration between users, both inside and outside your company. With each Microsoft 365 Group, members get a group email and shared workspace for conversations, files, and calendar events, Stream,

and a Planner.
