### QUESTION 1

You need to restore mailbox access for the main office users as quickly as possible. What should you do?

- A. Create a recovery database on another Exchange server, and then restore the database from EX07 to the recovery database.
- B. On a server in DAG15, create a copy of the mailbox databases hosted on EX07.
- C. Copy the database files from EX07, and then mount the database on a server in DAG15.
- D. On a new server, run `setup.exe /Mode:RecoverServer` from the Exchange Server 2019 installation media and then restore a backup of the database.

Correct Answer: D

---

### QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has two offices.

The network contains an Active Directory forest. The forest contains two domains. Each office is configured as an Active Directory site.

You need to recommend a plan for the deployment of Microsoft Exchange Server 2019 servers. The plan must ensure that a copy of each sent email message is always retained in a shadow queue.

Solution: Deploy a standalone Exchange server to each site. Add each server to a different domain.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

---

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has two offices.

The network contains an Active Directory forest. The forest contains two domains. Each office is configured as an Active Directory site.

You need to recommend a plan for the deployment of Microsoft Exchange Server 2019 servers. The plan must ensure that a copy of each sent email message is always retained in a shadow queue.

Solution: Deploy two standalone Exchange servers to each site. Both servers will be in the same domain.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

---

#### QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization.

You discover that several weeks ago a mailbox administrator erroneously deleted a mailbox from a mailbox database named MailDB1. The mailbox was associated to a user named User1 and an email address of user1@contoso.com.

You verify that User1 still exists in Active Directory.

You need to verify whether the mailbox can be reconnected to User1.

Solution: You run the following command.

```
$30 days - (Get-Date).AddDays(30)
```

```
Get-MailboxDatabase | Get-MailboxStatistics | Where {$_.DisconnectDate -lt $30days} | Format-Table  
DisplayName,Database,DisconnectDate
```

Does this meet the goal?

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization.

A. Yes

B. No

Correct Answer: B

## QUESTION 5

### HOTSPOT

You have a Microsoft Exchange Server 2019 organization that contains a Mailbox server named EX01. EX01 contains a mailbox database named MailDB01.

You attach a new hard drive named F to EX01. On drive F, you create a folder named Databases.

You plan to run the following command on EX01.

```
Move-DatabasePath -Identity MailDB01 -EdbFilePath
```

```
F:\Databases\MailDB1.edb -ConfigurationOnly $false
```

What is the effect of running the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

The command will:

	▼
complete successfully but disconnect users	
complete without disconnecting any users	
only run during a maintenance schedule	

If MailDB1 was mounted before running the command, the database:

	▼
will mount automatically	
must be mounted manually	
must be repaired before the database can be mounted	

Correct Answer:

## Answer Area

The command will:

	▼
complete successfully but disconnect users	
complete without disconnecting any users	
only run during a maintenance schedule	

If MailDB1 was mounted before running the command,  
the database:

	▼
will mount automatically	
must be mounted manually	
must be repaired before the database can be mounted
