## QUESTION 1

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins\_Brussels, RegionalAdmins\_Munich,

RegionalAdmins\_London, RegionalAdmins\_Vienna and RegionalAdmins\_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

#### Requirements

#### Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

#### Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without and-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

#### Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to recommend a procedure for closing the Brussels office that meets the technical requirements.

What should you recommend?

A. In the main office, deploy an Exchange Server 2016 server that has the Unified Messaging role installed, and then move the mailboxes from the Brussels office to the new server.

B. Deploy a Microsoft Skype for Business 2019 server to the main office, and then move the mailboxes from the Brussels office to an Exchange Server 2019 server in the main office.

C. Implement a new mailbox database on an Exchange Server 2019 server in the main office, and then move the

mailboxes from the Brussels office to the new mailbox database.

D. Implement a new database availability group (DAG) that contains the server in the Brussels office and a new Exchange Server 2019 server in the main office, and then create a mailbox database copy on the new server in the main office.

Correct Answer: C

## QUESTION 2

### HOTSPOT

You have a Microsoft Exchange Server 2019 organization. You run the commands shown in the following exhibit.

```
[PS] C:\> New-ThrottlingPolicy -Name TP1 -PowerShellMaxOperations 10 -  
PowerShellMaxCmdlets 6 -ExchangeMaxCmdlets 5 -  
PowerShellMaxCmdletsTimerPeriod 10
```

Name	ThrottlingPolicyScope	IsServiceAccount
TP1	Regular	False

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

TP1 will apply to [answer choice].

- all users in the organization
- specific users only
- mail-enabled groups only

If TP1 applies to User1, and User1 exceeds the limit, [answer choice].

- all cmdlets will fail
- all cmdlets will slow down
- only cmdlets over the limit will fail
- only cmdlets over the limit will show down

Correct Answer:

TP1 will apply to [answer choice].

all users in the organization
specific users only
mail-enabled groups only

If TP1 applies to User1, and User1 exceeds the limit, [answer choice].

all cmdlets will fail
all cmdlets will slow down
only cmdlets over the limit will fail
only cmdlets over the limit will show down

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You create a new safe links policy and apply the policy to finance department users.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

#### QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You create a new Microsoft 365 E5 subscription.

You need to identify which administrator deleted mailboxes during the last two days.

Solution: From Exchange Online PowerShell, you run New-AdminAuditLogSearch.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

#### QUESTION 5

You have a Microsoft Exchange Server 2019 organization that contains the administrator accounts in the following table.

NAME	Member of role group
Admin1	Organization Management
Admin2	Server Management, ExecAdmins

From PowerShell, you receive the following output.

```
[PS] C:\>Get-ManagementScope "Executive Databases"

RecipientRoot           :
RecipientFilter         :
ServerFilter            :
DatabaseFilter          : Name -like 'ADMIN*'
TenantOrganizationFilter :
ScopeRestrictionType   : DatabaseScope
Exclusive               : True
Name                   : Executive Databases
Identity               : Executive Databases

[PS] C:\>Get-ManagementRoleAssignment "Databases-ExecAdmins"

User                    : litware.com/Users/ExecAdmins
AssignmentMethod        : Direct
Identity               : Databases-ExecAdmins
EffectiveUserName       : All Group Members
RoleAssigneeType       : SecurityGroup
RoleAssignee            : litware.com/Users/ExecAdmins
Role                   : Databases
RoleAssignmentDelegationType : Regular
CustomRecipientWriteScope :
CustomConfigWriteScope  : Executive Databases
RecipientReadScope     : Organization
CobfigReadScope        : OrganizationConfig
RecipientWriteScope     : Organization
ConfigWriteScope       : ExclusiveConfigScope
Enabled                 : True
RoleAssigneeName       : ExecAdmins
```

For each following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

**Answer area**

Statements	Yes	No
Admin1 can dismount a database named ADMIN-DB1.	<input type="radio"/>	<input type="radio"/>
Admin2 can dismount a database named ADMIN-DB1.	<input type="radio"/>	<input type="radio"/>
Admin2 can dismount a database named MBX-DB1.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer area

Statements	Yes	No
Admin1 can dismount a database named ADMIN-DB1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin2 can dismount a database named ADMIN-DB1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin2 can dismount a database named MBX-DB1.	<input type="radio"/>	<input checked="" type="radio"/>
