QUESTION 1

You have an Exchange Online tenant that has the anti-spam settings configured as shown in the following exhibit.

| | |
|---|-----------------------------------|
| Standard settings  On | |
| Standard | |
| Spam action | Move message to Junk Email folder |
| Mark bulk email as spam | On |
| Bulk threshold | 7 |
| Mark NDR backscatter as spam | Off |

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Users will see safety tips when they access their mailbox from [answer choice].

- Outlook on the web only
- Microsoft Outlook 2019 only
- Microsoft Outlook 2019 and Outlook on the web

To reduce the amount of bulk email delivered to the inbox folders of users, you must [answer choice.]

- modify Spam action
- increase the value of Bulk threshold
- decrease the value of Bulk threshold

Correct Answer:

Answer Area

Users will see safety tips when they access their mailbox from [answer choice].

| |
|---|
| ▼ |
| Outlook on the web only |
| Microsoft Outlook 2019 only |
| Microsoft Outlook 2019 and Outlook on the web |

To reduce the amount of bulk email delivered to the inbox folders of users, you must [answer choice.]

| |
|--------------------------------------|
| ▼ |
| modify Spam action |
| increase the value of Bulk threshold |
| decrease the value of Bulk threshold |

QUESTION 2

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to implement a solution that meets the technical requirements for the retention of junk email, sent items, and deleted items.

What is the minimum number of retention policies and retention tags you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Retention tags:

| | |
|----|---|
| | ▼ |
| 1 | |
| 2 | |
| 3 | |
| 14 | |
| 30 | |

Retention policies:

| | |
|----|---|
| | ▼ |
| 1 | |
| 2 | |
| 3 | |
| 14 | |
| 30 | |

Correct Answer:

Answer Area

Retention tags:

| | |
|----|---|
| | ▼ |
| 1 | |
| 2 | |
| 3 | |
| 14 | |
| 30 | |

Retention policies:

| | |
|----|---|
| | ▼ |
| 1 | |
| 2 | |
| 3 | |
| 14 | |
| 30 | |

QUESTION 3

You have a Microsoft Exchange Server 2019 organization.

Users access their email by using Microsoft Outlook 2019.

The users report that their address list in Outlook sometimes takes a full day to show new entries.

You need to ensure that the address list updates within four hours.

Which cmdlet should you run?

- A. Set-MailboxServer
- B. Set-OfflineAddressBook
- C. New-OfflineAddressBook
- D. New-SettingOverride

Correct Answer: D

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You create a new safe links policy and apply the policy to finance department users.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

QUESTION 5

You have a Microsoft Exchange Server 2019 organization.

You need to ensure that a user named User1 can prevent mailbox content from being deleted if the content contains the words Fabrikam and Confidential.

What should you do?

- A. Add User1 to the Organization Management management role group.
- B. Add User1 to the Records Management management role group.
- C. Assign the mailbox Search and Mailbox Import Export
- D. Assign the Mailbox Search and Legal Hold management roles to User1.

Correct Answer: D
