QUESTION 1

You have a Microsoft Exchange Server 2019 organization.

You purchase a Microsoft Office 365 E5 subscription.

You plan to implement Exchange Modern Hybrid and free/busy sharing.

Which two components should you configure for the planned implementations? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a sharing policy
- B. a federation trust
- C. a relying party trust
- D. Active Directory Lightweight Directory Services (AD LDS)
- E. an organization relationship

Correct Answer: BE

QUESTION 2

You have a Microsoft Exchange Online tenant that contains a mailbox named Sales.

You need to create a copy of all the external email sent from the Sales mailbox to an alternate location.

What should you create?

- A. a journaling rule
- B. a retention policy
- C. a records management file plan
- D. a data loss prevention (DLP) policy

Correct Answer: A

Explanation:

Journaling in Exchange Online

When possible, we recommend that you use Microsoft 365 retention to archive and manage data in-place to meet your compliance requirements. However, some organizations might need to use a third-party solution to receive a copy of emails for storage or other scenarios. Configure journaling to store that data outside Exchange.

Journal rules

The following are key aspects of journal rules:

Journal rule scope: Defines which messages are journaled by the Journaling agent.

Journal recipient: Specifies the SMTP address of the recipient you want to journal.

Journaling mailbox: Specifies one or more mailboxes used for collecting journal reports.

Incorrect:

*

a retention policy

Managing content commonly requires two actions:

*

Retain content

Prevent permanent deletion and remain available for eDiscovery

*

Delete content

Permanently delete content from your organization

With these two retention actions, you can configure retention settings for the following outcomes:

Retain-only: Retain content forever or for a specified period of time.

Delete-only: Permanently delete content after a specified period of time.

Retain and then delete: Retain content for a specified period of time and then permanently delete it.

These retention settings work with content in place that saves you the additional overheads of creating and configuring additional storage when you need to retain content for compliance reasons. In addition, you don't need to implement

customized processes to copy and synchronize this data.

QUESTION 3

Your company has a Microsoft Exchange Server 2019 organization.

The company has 10,000 mailboxes. Each department at the company has 1,000 mailboxes.

You need to ensure that when users query the global address list (GAL), they can view only the list of the users in their department.

What should you create?

- A. One GAL, 10 offline address books (OABs), 10 address lists, 10 address policies (ABPs), and one email address policy
- B. 10 GALs, 10 offline address books (OABs), 10 address lists, 10 room lists, and 10 address book policies (ABPs)
- C. One GAL, 10 offline address books (OABs), 10 address lists, 10 room lists, and one address book policy (ABP)
- D. 10 GALs, 10 offline address books (OABs), 10 address lists, and 10 email address policies

Correct Answer: B

References: <https://docs.microsoft.com/en-us/exchange/address-books/address-lists/create-global-address-list>
<https://docs.microsoft.com/en-us/exchange/address-books/address-book-policies/address-book-policies>

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.

You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.

Solution: You convert all the mailboxes to shared mailboxes, and then you run the Set-Mailbox cmdlet and specify the MailAddressPolicyEnabled \$false parameter.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Reference:

<https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-address-policies?view=exchserver-2019>

Email address policies define the rules that create email addresses for recipients in your Exchange organization.

The basic components of an email address policy are:

Email address templates: Define the email address format for the recipients (for example @contoso.com or .@contoso.com).

Recipient filter: Specifies the recipients whose email addresses are configured by the policy.

Priority: Specifies the order to apply the email address policies (important if a recipient is identified by more than one policy).

The EmailAddressPolicyEnabled parameter specifies whether to apply email address policies to this recipient. Valid values are:

\$true: Email address policies are applied to this recipient. This is the default value.

\$false: Email address policies aren't applied to this recipient.

QUESTION 5

You need to encrypt email between Fabrikam and Litware to support the planned changes. What should you configure in the Exchange admin center?

- A. a connector
- B. an organization relationship
- C. a sharing policy
- D. a remote domain

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/use-connectors-to-configure-mail-flow/set-up-connectors-for-secure-mail-flow-with-a-partner>
