QUESTION 1

Your company has a Microsoft 365 subscription.

The company plans to use Office 365 groups and Microsoft Yammer. However, there might be users who do not have a corresponding Yammer identity.

You need to verify which users are only Yammer users. The solution must minimize administrative effort.

What should you do?

A. Export the users from Yammer. Export the active users from Microsoft 365. Compare the user names.

B. From the Microsoft 365 admin center, view the usage reports.

C. Run the Get-MSOLUser cmdlet and filter the results by License.

D. Run the Get-TeamUser cmdlet and filter the results by GroupId.

Correct Answer: B

QUESTION 2

You have a Microsoft 365 subscription.

You have the following requirements for Microsoft OneDrive for Business and Microsoft SharePoint Online:

When content is shared with external users, the users must sign in before they can access the content.

When OneDrive for Business content is shared with external users, the users must have a guest account in Microsoft Azure Active Directory (Azure AD).

You need to configure external sharing to meet the requirements.

Which option should you configure for each setting? To answer, drag the appropriate options to the correct settings. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Option

Anyone
Existing external users
New and existing external users
Only people in your organization

Answer Area

External Sharing setting for SharePoint: Option

External sharing setting for OneDrive: Option

Correct Answer:

Option

Anyone
Only people in your organization

Answer Area

External Sharing setting for SharePoint: New and existing external users

External sharing setting for OneDrive: Existing external users

QUESTION 4

You have a Microsoft 365 subscription.

You need to prevent unmanaged devices from accessing Microsoft OneDrive for Business.

Which admin center should you use?

A. Intune

B. Azure ATP

C. SharePoint

D. Security and Compliance

Correct Answer: C

QUESTION 5

You plan to create two site collections named Project1 and Project2. The site collections will be used to collaborate with external users from partner companies. All the external users belong to partner companies that have their own Microsoft Azure Active Directory (Azure AD) tenant.

You have the following requirements for Project1 and Project2:

Internal users must be able to share the content in Project1 with the external users from only a partner company named Contoso, Ltd.

Internal users must be able to share the content in Project2 with users from any partner company

You need to configure the sharing settings and the domain-based filtering settings for each site collection.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Site Collection	Domain-based Filtering Setting	Sharing Setting
Project1	Allow List Deny List None	Allow external users who accept sharing invitations and sign in as authenticated users. Allow sharing only with the external users that already exist in your organization's directory
Project2	Allow List Deny List None	Allow external users who accept sharing invitations and sign in as authenticated users. Allow sharing only with the external users that already exist in your organization's directory

Correct Answer:

Answer Area

Site Collection	Domain-based Filtering Setting	Sharing Setting
Project1	**Allow List** Deny List None	**Allow external users who accept sharing invitations and sign in as authenticated users.** Allow sharing only with the external users that already exist in your organization's directory
Project2	Allow List Deny List **None**	**Allow external users who accept sharing invitations and sign in as authenticated users.** Allow sharing only with the external users that already exist in your organization's directory
