## QUESTION 1

You need to deploy hybrid OneDrive for Business to all the remaining users.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
From the Configure hybrid OneDrive and Site features page, set the audience to <b>Audience1</b> .	
Configure the My Site web application to use Secure Sockets Layer (SSL).	
Run the SharePoint Products Configuration Wizard.	
Create an audience named Audience1 from a User Profile service application.	
From the Configure hybrid OneDrive and Site features page, set hybrid features to <b>None</b> .	
From Central Administration, run the Hybrid Configuration Wizard. Select <b>Hybrid OneDrive</b> and <b>Mysite creation default to OneDrive in O365</b> .	

Navigation icons: > < (between columns) and ^ v (within Answer Area)

Correct Answer:

**Actions**

Configure the My Site web application to use Secure Sockets Layer (SSL).

Run the SharePoint Products Configuration Wizard.

From the Configure hybrid OneDrive and Site features page, set hybrid features to **None**.

**Answer Area**

Create an audience named Audience1 from a User Profile service application.

From Central Administration, run the Hybrid Configuration Wizard. Select **Hybrid OneDrive** and **Mysite creation default to OneDrive in O365**.

From the Configure hybrid OneDrive and Site features page, set the audience to **Audience1**.

**QUESTION 2**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than once correct solution,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a SharePoint Server farm.

You create an external content type named ECT1 for a Microsoft SQL Server database.

You implement cloud hybrid search.

You create a Line of Business Data content source and run a full crawl.

Users in SharePoint Online report that the search results do not contain any data from ECT1.

You need to ensure that searches can return data from ECT1.

Solution: You grant the Default content access account Read permissions to the Central Administration web application.

Does this meet the goal?

A. Yes

B. No

---

Correct Answer: B

---

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a SharePoint Server farm.

You create an external content type named ECT1 for a Microsoft SQL Server database.

You implement cloud hybrid search.

You create a Line of Business Data content source and run a full crawl.

Users in SharePoint Online report that the search results do not contain any data from ECT1.

You need to ensure that searches can return data from ECT1.

Solution: From a Business Data Connectivity Service application, you grant the Default content access account Manage permissions to ECT1.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

---

### QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a SharePoint Server farm.

You configure the farm to support custom tiles, and you add an item to the custom tiles list.

You discover that the new item appears at the bottom of the list in the app launcher.

You need to ensure that the new item appears first on the list.

Solution: You run the Set-SPWebApplication cmdlet and specify the -AssignmentCollection parameter.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

---

#### QUESTION 5

You have a SharePoint Server farm.

You need to ensure that only errors from SharePoint Server are logged in Event Viewer.

What should you configure from the Diagnostic Logging settings?

A. usage and health data

B. Event Throttling

C. Event Log Flood Protection

D. Restrict Trace Log disk space usage

Correct Answer: B
